DICTIONARY

The successor of the "UNABRIDGED."

TEN YEARS WERE SPENT REVISING, 100 EDITORS EMPLOYED,
AND OVER \$300,000 EXPENDED.

Everybody should own this Dictionary.

It answers all Questions
concerning the

HISTORY, SPELLING,
PRONUNCIATION and
MEANING OF WORDS.

A LIBRARY IN ITSELF.

It also gives facts often wanted concerning the eminent persons, ancient and modern ; noted fictitious persons and places ; the countries, cities, towns, and natural features of the globe ; translation of foreign quotations, words, phrases and proverbs ; etc., etc., etc.

THIS WORK IS INVALUABLE in the household, and to the teacher, scholar, professional man, and self-educator.

THE GLOBE, Toronto, says:—This new dictionary is the best book of its kind in the English language. For every family, the members of which have mastered the art of reading, its purchase will prove a profitable investment.

THE TIMES, Hamilton, says:—It may well be pronounced the best working dictionary and the cheapest book in the world, and should be in every school and family in Canada.

Explanation of the Articles in the Calendar.

These pages are calculated for Toronto, Quebec and Winnipeg, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada. For Latitude and Longitude of Observatory see page 22.

NOTE—Standard times* are given in all columns headed Toronto, Quebec and Winnipeg.

The times* of the SUN'S RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec and Winnipeg.

The standard times* both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec and Winnipeg.

The column, SUN ON MERIDIAN, gives the time that a watch keeping local mean time should show when the shadow of a sun dial is on the noon mark.

MOON'S AGE.—This column shows to the nearest tenth of a day the Moon's age at Toronto mean noon.

The column, UPPER TRANSIT OF POLE STAR, shows for every day the mean time* at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m W. It passes the meridian twice on October 11.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m, 2s. to the time of the preceding upper transit.

The seven last columns will serve with sufficient accuracy for the whole of Canada.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other Latitude is required, the number given in the column should be corrected by means of the following Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
1st Correction for Degrees	−5' 10"	−3' 32"	−1' 49"	0' 00"	+1' 55"	+3' 55"	+6' 3"	+8' 17"	+10' 39"
2nd Correction for each minute of latitude	+ 1".6	+ 1".7	+ 1".8	+ 1".9	+ 2".0	+ 2".1	+ 2".2	+ 2".4	+ 2".5

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the Table by the number of minutes in the latitude.

Thus for latitude 43° 20'. 1st correction = − 3' 37"	2nd correction + 1.7 × 20 = + 0' 34"
" " 47° 40' " " = + 3' 55"	" " + 2.1 × 40 = + 1' 24"
" " 45° 10' " " = 0' 0"	" " + 1.9 × 10 = + 0' 19"

MOON'S PHASES.—This Table gives the times (standard 75th meridian)* when the Moon passes the geocentric longitudes of 0°, 90°, 180°, and 270° east of the sun. It gives also the times of her greatest and least distance from the earth.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Latitude	42°	43°	44°	45°	46°	47°	48°	49°	50°
Constant ...	h m s 5 54 31	h m s 5 54 21	h m s 5 54 11	h m s 5 54 1	h m s 5 53 50	h m s 5 53 39	h m s 5 53 27	h m s 5 53 16	h m s 5 53 3
Difference for 10' of latitude.	−1.7	−1.7	−1.7	−1.8	−1.8	−2.0	−1.8	−2.2	

* In the present Almanac, the hours are numbered from 0 (midnight) to 23.

† Although these times are calculated for Toronto, Quebec and Winnipeg only, the standard times at other places not differing much from them in latitude may be obtained with sufficient accuracy for ordinary purposes, by adding four minutes for every degree west, and subtracting four minutes for every degree east of these places.

Star Table.

From the times of the upper transit of the Pole Star may be derived, with the aid of the following Table, the times of culmination, and of the rising and setting of the principle fixed stars, as seen from the parallel of 45° north latitude.

To ascertain when any star found in the following Table will be on the meridian, *add* the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of the star, *subtract* the number opposite to it in the right-hand column of figures from the time of its meridian passage. For the *setting* of a star, *add* the same number to the time of its meridian passage. Those stars marked (....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Eclipses.

In the year 1894 there will be four Eclipses, two of the Sun and two of the Moon.

I.—A partial eclipse of the Moon March 21st invisible in Canada.

II.—An annular eclipse of the Sun April 5th invisible in Canada.

III.—A partial eclipse of the Moon September 14th-15th, Eastern Standard Time, visible in Canada.

Moon enters penumbra September 14th, 21'0h. Moon enters shadow September 14th, 22'6h. Middle of eclipse September 14th, 23'5h. Moon leaves shadow September 15th, 0'5h. Moon leaves penumbra September 15th, 2'0h.

Magnitude of the eclipse (Moon's diameter = 1) 0'225

IV.—A total eclipse of the Sun September 28th invisible in Canada.

There will be a transit of Mercury across the Sun's disc November 10th visible in Canada.

The standard time of the various contacts for any place the radius being ρ , the Geocentric North Latitude l and West Longitude λ are given by the formula.

First external contact Nov. 10th 10h. 55'7m. + [0'7990] $\rho \sin l$ — [1'6412] $\rho \cos l \cos (29^\circ 40' 0'' + \lambda)$

First internal contact Nov. 10th 10h. 57'4m. + [0'7910] $\rho \sin l$ — [1'6417] $\rho \cos l \cos (29^\circ 11' 2'' + \lambda)$

Angle of contact from the North Pole toward the East 98° for direct image.

Last internal contact by Nov. 10th 16h. 11'4m. + [1'4281] $\rho \sin l$ — [1'5310] $\rho \cos l \cos (142^\circ 25' 9'' + \lambda)$

Last external contact by Nov. 10th 16h. 13'1m. + [1'4263] $\rho \sin l$ — [1'5316] $\rho \cos l \cos (141^\circ 55' 3'' + \lambda)$

North Pole 50° towards the West.—The quantities in brackets are the logarithms of seconds of time.

Some Facts About Canada.

The Dominion of Canada has an area of about 3,315,647 square miles, or, including its water surface, 3,456,383 square miles, is about 3,500 miles from east to west and 1,400 miles from north to south, and consists of the provinces of Ontario and Quebec (formerly Upper and Lower Canada), Nova Scotia, New Brunswick, Manitoba, British Columbia, Prince Edward Island and the North-west Territories, (which latter contain the vast territory formerly under the control of the Hudson's Bay Company). It, therefore, comprises the whole of the northern half of North America, with the exception of the United States Territory of Alaska on the west, and Labrador, which is under the control of the Government of Newfoundland, on the east. It is bounded on the north by the Arctic Ocean, on the west by the Territory of Alaska and the Pacific Ocean, on the south by the United States and on the east by the Atlantic Ocean.

THE SOLAR SYSTEM.

BY G. E. LUMSDEN.

Notwithstanding the attacks made upon it of late years by some eminent writers, scientific men usually concede that the nebular hypothesis of Swedenborg and Kant, revised by Laplace, and modified in various respects by modern discoveries in physics, most nearly agrees with observed facts in its attempt to account for the origin of the solar system. It is said to have been thrown out by Laplace himself rather as a suggestion than as a theory which he had worked out, for, it is claimed, he never subjected it to a mathematical examination. This hypothesis, which some find outlined in the writings of Moses, supposes that all matter once existed as glowing vapour, "without form and void," and in an exceedingly diffused state, rarer, indeed, than any gas with which we are acquainted; that this vapour filled the length and breadth, and perhaps the height and depth, of a space vastly larger than the orbit of Neptune; that the outer particles gravitated towards a centre; that condensation produced a globular mass which took up a motion of rotation increasing in rapidity as the mass grew smaller; that it threw off rings which, one after another, in the gradual processes of shrinking, were left behind by the retreating central portion which became, first, the nucleus of the nebula, and, in time, the sun; that in each ring there formed a part sufficiently dense to become a planet which, in turn, drew to itself all the remaining matter in the ring; that at this epoch of existence, the planet occupied a much larger space than at any subsequent period, and that, by also rotating upon an axis, the planet threw off rings which, in the same manner, became moons. Croll's theory supposes the system to be the result of the collision of two bodies, probably extinct suns, which, by the violence of the impact, were converted into the nebula which the other theory disposes of in the manner described, but Croll's theory does not account for the creation of the pre-existing suns.

THE SUN.

The Sun is the ruler as well as the centre of the solar system. His importance can scarcely be overestimated. Consequently, we are interested in knowing something of his size, surface, mass, volume, density, weight, energy, motion, light and heat, and of the

materials of which he is composed. For us, he is the source of light and heat, and, therefore, of life. Without his nourishing warmth, no form of animal life could survive on the land, in the air, or in the water. He is also the source of every species of energy existing on the earth, excepting only the action of the tides and those activities due to internal heat. His heat is radiated into space in every direction, and in an apparently prodigal manner, for his planets are able to intercept only one two hundred and thirty-four millionth part of it; the Earth receives only one two thousand millionth part of the entire volume emitted. The Sun's radiating surface is 11,940 times larger than the surface of the Earth. From this surface, is steadily emitted heat sufficient to warm 2,200,000,000 worlds like ours, if they could be placed around the Sun in the form of a hollow sphere at the Earth's distance. Langley computes that this heat, if concentrated for the purpose, could in every second of time, melt and dissipate into vapour, a column of ice fifteen miles thick, and stretching from the Earth to the Moon, a distance of 240,000 miles. In volume, the Sun exceeds the Earth 1,305,200 times, and in mass, 330,500 times; in these respects he dwarfs all the planets, whether taken individually or collectively. Like most solar stars, he has a proper motion of his own in the heavens, so that, as he rushes onward at a pace variously estimated at from 12 to 18 miles a second, he is continually emitting his light and heat into new realms, from which, in some way unknown to man, he may be deriving the supplies required to sustain the enormous drain upon his resources. He may be, and probably is, travelling along a vast orbit. At present, his objective point appears to be the same as it was one hundred years ago, viz., a star in Hercules, a constellation overhead at night in Canada, in the summer months. His mass enables him to carry with him his family of planets, moons, comets and meteor-streams, all revolving around him in the utmost harmony and in orbits fixed by the operation of forces at work throughout the solar system. The Sun, as seen on the mid-day sky, subtends an angle of about one-half a degree of arc, but his size enables him to do so from a distance of 92,780,000 miles, his diameter being 865,240 miles. A point moving at the rate of one mile a minute would require 600 days to traverse his diameter, and more than five years to complete the cir-

cut of his globe. The nucleus, or non-luminous body of the Sun, which may be cool and comparatively small, is surrounded by the photosphere, the blazing, light-giving envelope, which, in the telescope, presents a beautifully mottled, or marbled surface, frequently illumined by faculae, or darkened by spots due to causes not perfectly understood, and subject to a periodicity occupying about 11 years, during which the spots pass through a maximum and minimum, there being considerable intervals when no spots at all can be detected. In these spots, more or less rapid changes in size and shape often occur. When the changes are most violent, they are usually observed to be the results of tremendous solar activity accompanied by cyclonic action on a scale of which we can form no adequate conception. Occasionally, spots are very persistent in duration, and can be followed by observers for weeks and months as they turn with the Sun during his rotation-period of about 26 days, a period discovered by means of this very persistency. The photosphere is covered by the chromosphere, consisting of a layer of glowing vapours and gases of very irregular depth, and composed at the bottom of metals volatilized by fervent heat, and at the top of hydrogen gas. By violent uprushes from below, sometimes with a velocity of hundreds of miles a second, these gases, like tongues of red flame, are projected into the transparent atmosphere, which lies above the chromosphere. The atmosphere is surrounded by the corona, a mass of soft white light brightest at the edges of the sun's disc and extending far beyond the red flames or "prominences," as they are called by the astronomers. The composition of the corona is still a mystery, largely due to the fact that it can be examined only during the few moments of totality at total eclipses of the Sun, themselves comparatively rare. Scientific interest in the Sun and his appendages has greatly increased since the discovery of the spectroscope, a prismatic device which sifts white light into its original colours and presents a spectrum, like a narrow ribbon, crossed at irregular intervals by bright and dark lines and bands whose intensity and position in the various rainbow colours have a world of meaning for the skilled observer. Though only a very small instrument, when contrasted with large telescopes, the spectroscope, in so far as the Sun, stars, comets and nebulae are concerned, discloses information regarding their composition respecting which even the finest telescopes are silent. By its aid, and by using, as bases of comparison, the spectra of metals volatilized by the heat of the electric spark, spectroscopists have shown that the following elements exist in a state of vapour in the glowing solar atmosphere:—hydrogen, sodium, barium, calcium, magnesium, aluminium, iron, manganese, chromium, cobalt, zinc, copper and titanium, elements which establish an undoubted relationship between, and show the common origin of, the Sun and the Earth, as regards some of the materials entering into their composition. It can be proved that, in a greater or less degree, this relationship also exists between the Sun and stars, and even those nebulae whose spectra are bright enough to afford satisfactory analysis. Certain terrestrial elements, such as gold, silver, platinum, lead, mercury and tin, have not yet been recognized in the vapours of the Sun, while various lines in solar and stellar spectra indicate in the Sun and bright stars the presence of elements not known to us. On the whole, the evidence is in favour of the theory that all the members of the universe, whatever their stage of existence, have been formed from the same elements, possibly consisting of chemical combinations of some primal matter. Some think that this matter exists as a subtle, or elastic, fluid, called the ether, supposed to pervade all space. Classified by uniformity in spectra, the stars have been arranged by Secchi in four groups, viz.: I. Sirian, or white stars; II. Solar, or yellow stars; III. Red, or variable stars; and IV. Small red stars with banded spectra. The spectroscope has performed another service. It has enabled experts to determine whether a star or a nebula is moving in a direction from us or toward us, and the velocity of its flight. Vast as the solar system appears to us to be, it occupies but an infinitesimal portion of space, and probably belongs to the secondary rank of stellar aggregations. This view has been illustrated in many ways. For instance, if the planets and their orbits be drawn upon a scale showing the Earth as a point half-an-inch distant from another and central point representing the Sun, Mars would appear as a point three-quarters of an

inch from the centre of the scale; Jupiter would be two inches and a-half distant; Saturn, four and three-quarters; Uranus, nine and a-half; and Neptune fifteen inches distant, while for Alpha Centauri, the nearest fixed star, a point would have to be placed 103,133 inches, or more than one mile and a-half away. Again, light which travels with a velocity of 185,000 miles a second, passes outwards from the Sun to Neptune in a little more than four hours, but requires four and one-half years to reach Alpha Centauri. So that the solar system has plenty of room. Most probably, every other system, comparatively speaking, has equal room within which to move. There are millions of suns in all stages of existence, no doubt attended by planets, comets and meteor-streams, invisible to us because they are not self-luminous. Observation justifies the supposition that all the stars and nebulae are in motion, but some are so distant that telescopic observation extending over years has failed to show parallax, or a change of position. Some stars are "flyers," and rush through space with velocities not equalled in the solar system. Some are so distant that the light by which we see them, left them ten, twenty, thirty or more years ago. Elkin asserts that the light by which Arcturus, that chief among giant suns, is visible to us, was emitted by him in the days of Queen Anne.

MERCURY.

The belt of asteroids divides the solar planets into two groups. The inner or terrestrial group includes the minor planets Mercury, Venus, the Earth, the Moon and Mars. The outer or major planets are Jupiter, Saturn, Uranus and Neptune. It is not now believed that there are intra-Mercurial planets. Owing to proximity to the Sun, Mercury, in our latitudes, is a difficult object for observation. Comparatively speaking, he is rarely visible to the naked eye, and then only for a few days at a time and near the horizon, either just before sunrise or after sunset. As his orbit is within that of the Earth, he, in the course of his year, comprising 87 of our days, shows all the phases of the Moon. Occasionally, he transits the solar disc. The last of the transits for this century will occur on the 10th of November, 1894. Proctor contends that, being a small body, rapid cooling has already caused Mercury to pass through all the stages of planetary life, and that he is, consequently, a dead planet. For this assertion, there is no telescopic proof.

VENUS.

As evening and morning star, Venus attains great brilliancy, owing to her vicinity to the Sun. This brilliancy, added to her dense atmosphere, makes her also a difficult object to study satisfactorily in a telescope. Little is certainly known of her surface, but it is supposed to be varied by land and water. Some observers are confident they have glimpsed very high mountains. Venus presents phases like Mercury and the Moon, some of them very beautiful. For the astronomer, her chief value consists in her transits of the Sun's disc, which occur in pairs, eight years apart, and at intervals of about 120 years. By means of these transits, the Sun's distance from the Earth is measured, though Mars and a few of the brightest asteroids are occasionally used for that purpose and are preferred by some astronomers.

THE EARTH.

Much could be said of the Earth; of her size, mass, volume, distance from the Sun, attractive force; of the distribution of land and water and their influence upon climate; of her age, her past, present and of her future; of her seasons, due to the inclination, by 23½ degrees, of her axis to the plane of her orbit; of her days and nights, due to rotation on her axis; of their varying length, due to her revolution around the Sun; of her Moon, the largest in the solar system when the size of the Earth is considered; of the Moon's variegated surface, her phases, eclipses, librations, age; of her day and night, each two of our weeks in length; of her appearance to the naked eye, and in the telescope where she probably forms the most beautiful object in the sky. But these are familiar topics. It will suffice to quote a few sentences from the eloquent Proctor when generalizing upon the subject: "The Earth is the one member of the system that we can study in detail. We cannot only learn what she is now, but what she has been in the past. What we have learned about her, we have

learned in some degree of the other planets also. There may be—nay, there must be—differences in planetary life-histories, due to differences of mass, size, position, age, and so forth, precisely as there are differences in animal and vegetable life-histories. . . . That the Earth's history in the past must be measured by millions of years we know from the study of that Great Bible of Nature, whose leaves are the layers, and its volumes the strata, of the Earth's crust. . . . The geologist can actually handle the material produced in past ages by processes which he now sees at work. The biologist has, in like manner, direct evidence of the progress of the development in varieties, species and genera of animal and vegetable life. Each has material evidence of the millions of years of which he speaks, whereas the astronomer, though he may ascertain practically that the Sun, Moon and stars have existed for even longer periods, can give no direct evidence for the faith that is in him."

MARS.

For a terrestrial observer, one of the most interesting features of Mars is the decisive evidence he bears of a general resemblance to the Earth. Accurate maps of his surface-markings have been drawn at the telescope and published, and even globes of him have been made and are in constant use when he is in opposition to the Sun, that is, when the Earth is in a line between him and the Sun, and when the two planets are, consequently, closest together. There is little doubt that Mars, practically our nearest neighbor, has land, water, air, mists, clouds, frost, snow, ice, summer heat, and seasons comparable to, but nearly twice as long as ours, as the inclination of his axis is nearly the same as that of the Earth. As a summer season wears on on Mars, the snow and ice forming the cap on and about the pole, for the time being exposed to the Sun, can be seen to become greatly reduced in size, precisely as the corresponding polar cap on the Earth is reduced in one of our summers. When summer on Mars has passed, and winter draws on, the reduced cap can be observed to again gradually grow to its normal winter size. Varying tints, changing from rich dark green to yellow, have frequently been noticed by astronomers, but they have not yet, in so many words, ventured to ascribe these changes to vegetation passing through its various stages. Being a smaller body, and having, therefore, cooled more rapidly, it is probable that, as regards planetary life, Mars is more advanced than the Earth. There has been much speculation regarding the causes of certain surface-markings, some of them not permanent, first noticed by Schiaparelli in 1881-2, and by him called "canals." That Mars is practically covered by a network of canals from 15 to 20 miles wide, and, at times, running parallel to each other for great distances and from 280 to 300 miles apart, as his theory claims, is incredible. By some observers, these apparitions are supposed to be due to an optical illusion. In 1877, Hall, at Washington, after a long search at a most favorable opposition, discovered two moons. The inner one is about 10 miles in diameter and revolves at a distance of about 5,800 miles from the planet's surface; the outer one is about 20 miles in diameter and is about 15,000 miles from the planet. Of what use these moons are, no terrestrial observer can imagine. The inner one is so close to the planet's equator that it cannot be seen from the polar regions, and travels with such swiftness that it passes completely around Mars twice in 24 hours, or while he is turning once on his axis. Consequently, it appears to rise twice every day in the west, and, having gone through all its phases, to set in the east.

THE ASTEROIDS.

According to Bode's Law of Planetary Distances, held in great esteem at the beginning of this century, there should be a planet somewhere near the centre of the vast space which separates Mars from Jupiter. The discovery of Uranus at a distance from Saturn which appeared to still further confirm the law, led to the formation, in 1800, of a Society, composed of expert astronomers, to search for the missing planet. They applied themselves with zeal, each taking a portion of the heavens for examination, but they were anticipated by Piazzi, not a member of the Society, who, on the 1st of January, 1801, discovered Ceres, one of the minute planets, from 10 to 120 miles in diameter, which occupy the space in question. The new planet

was telescopic in size, and so were Pallas and Juno discovered in 1802 and 1804. Vesta, the only naked-eye asteroid, was found in 1807. Since that date, some hundreds of others have been discovered, though some have since been lost and but a few of them again picked up. Photography having been brought to the aid of observers, the sum total is rapidly increasing—it is already in the vicinity of 350. Two theories to account for the asteroids have been advanced. One is, that at a remote period a planet was, by some cause, exploded into fragments. The other, that of Proctor, is that the zone of asteroids belongs to a region separating the Sun's special family of small planets from the region where, not so very long ago, travelled minor suns with their attendant worlds, the asteroids appearing to represent a portion of the material of the solar system, which, under more favourable circumstances, would have developed into a single planet, but, disturbed by the attraction of the great planet Jupiter, remained scattered in the form of a widely-strewn ring.

JUPITER.

To Galileo, by means of his telescope, inferior as it was, was first revealed some idea of the vast size and of the grandeur of Jupiter and his moon-system. The discovery that the planet had four moons was very unpopular and upset the received astronomy of that day, it being the fashion to believe that the members of the solar system could never exceed the sacred number seven, which had then long been reached. From that time to the present, Jupiter and his moons, to which in September, 1892, Barnard added a fifth, have been regarded as among the most attractive of the celestial objects. In a telescope, Jupiter is a large globe turning rapidly enough on his axis to permit of motion being easily detected. His bright disc is mottled with belts formed of cloud-masses irregular in outline and variously coloured. Some are of a deep chocolate tint, others of pearly-grey with tones of light olive-green, purple, yellowish-white, or ochreish-red. During Jovian sun eclipses, these belts are often traversed by the moon-shadows, black and round as drops of ink. They constantly change in shape, position and number. In very good telescopes, they appear to carry shadings, bright spots and egg-shaped clouds, all highly interesting to examine and to draw. The fifth moon is invisible except in some half-a-dozen of the best telescopes in the world. The other four present to the observer an ever-varying panorama of beauty. The phenomena include transits across the brilliant face of the planet, eclipses in his enormous shadow-cone, disappearances behind his gigantic bulk, and re-appearances. Sometimes the moons are to be seen all on one side of the planet, sometimes all on the other. Careful observation of the satellites of Jupiter when the Earth was on the same side of the Sun as he, and, again, when the Earth was on the opposite side of the Sun, adding a distance of 155,000,000 of miles, led to the discovery that light is not instantaneous in its passage, but requires time for propagation, one of the most remarkable discoveries made by modern science. Some writers assert that Jupiter is still hot enough to emit, through a non-luminous cloud-laden atmosphere, some small proportion of inherent light, and that from the surface of his fiery globe mighty currents carry aloft great masses of heated vapour which, as they find their way to the upper and cooler strata are converted into visible clouds, carried along at a stupendous velocity sometimes exceeding 150 miles an hour.

SATURN.

Despite his distance, Saturn, with his belts, rings and moons, forms a charming object in the telescope. The rings were first seen by Galileo, in 1610, but only as "ears" on an ill-defined planetary disc. His best telescope was too feeble to reveal the true nature of the ring-system, nor was it known until, in 1659, Huyghens saw that Saturn was surrounded by a thin, flat ring, nowhere touching him and inclined to the ecliptic. Owing to this inclination, Saturn during the period of thirty years he occupies in moving around the Sun, presents to the Earth first one side of his rings and then the other, each being visible for fifteen years under various oval forms. On those occasions when the rings are changing sides to us, their edges appear as a thin straight line. In 1675-6, Cassini noticed on the ring a dark marking, or shading, which, in 1789, with the best telescope of his day, Herschell determined to be really a broad circular

gap dividing the ring into two. In 1837, Encke observed in the outer ring, the lesser of the two, a second division since known by his name. Other observers have glimpsed other concentric markings indicative of a multiplicity of divisions, too faint to be individually visible from the Earth with our present appliances, and even suggesting to astronomers that the rings are neither solid nor fluid, as has been variously supposed, but are composed of swarms of meteorites, a theory which would account for their undoubted roughness and unevenness as seen, at times, when the edges of the rings are presented to the telescopic observer. In 1850, Bond, in the United States, and Dawes, in England, independently discovered the crape ring which lies close to the planet. The rings are about 100 miles thick and are sufficiently opaque to cast a dense shadow causing, as it were, an eclipse of the sun, so that, owing to them, there are zones of Saturn where the winter eclipse lasts for several of our years, being total during a large proportion of that time. To the naked-eye, Saturn shines as a second magnitude star. Like Jupiter, Saturn is perceptibly flattened at the poles, owing to swiftness of rotation. In colour, the rings are yellow-ochre shaded with sepia, the planet itself yellow-ochre and brown-madder, orange and purple shaded with sepia, while the poles and the narrow belts near them are pale cobalt-blue.

URANUS.

Uranus, the seventh planet, was accidentally discovered March 13th, 1781, by Herschell, who had conceived the idea of measuring the distances of the nearer stars by noting whether as the Earth circled around the sun, the relative positions of stars, lying very close to each other, seemed to vary in any degree. To this end, he was searching the heavens for double-stars, most of which were, in his day, supposed not to be physically associated together, but seen near together only because lying nearly in the same direction,—the brighter star of a pair being much nearer than the fainter one. Herschell first thought the new object was a comet and so reported it to the Royal Society. Owing to his vast distance from the Sun, Uranus moves very slowly, so slowly that although previously seen by Flamsteed, Bradley, Meyer, and many times by Lemonnier, he was charted as a star. The planet rotates on an axis almost parallel to his path, so that his poles are turned squarely towards the Earth at opposite points in his orbit. By travelling backwards, the four moons of Uranus reverse the natural order of revolution. The planet shines with a steady pale greenish light, intense enough to give a spectrum, and presents a disc in a telescope of some power. He can be detected by the naked eye on a fine dark night, and, partly for this reason, is believed to have been known to the ancients, who were very close observers of stellar bodies, whether fixed or moving.

NEPTUNE.

Neptune, the eighth planet, owes its discovery, September, 1846, by Galle, of Berlin, to circumstances unique in the annals of astronomy, though the surprising feature is, not that it was made then but, that it was not made in 1822, when Neptune and Uranus were actually in the same telescopic field, and when astron-

omers were alive to the fact that, for some unexplained, yet it should seem obvious, reason, the speed of Uranus in his orbit was being accelerated. This acceleration continued until 1822, when Uranus began to fall behind his calculated place, showing that whatever object had pulled him toward it, as he was approaching it, was now pulling him back, as, having passed, he was leaving it behind. This retardation increased until 1840, when Uranus resumed his accustomed pace again. In 1844, Adams obtained all the recorded English observations of acceleration and retardation, and after a mathematical analysis, which has rendered his name immortal, announced to the Astronomer Royal the position of the new and perturbing planet. Owing to his youth and lack of reputation, no serious attention was paid to Adams, and it remained for Leverrier, who had also been working independently on the problem, to announce to Galle, whose observatory was well fitted for the search, where the planet would be seen on the sky. Neptune shines as an 8th magnitude star, and is therefore, not visible to the naked eye. In a good telescope, he has a minute disc, greenish in hue. He has one moon, which, like those of Uranus, moves from east to west and in a backward direction.

So far as is known, there are no trans-Neptunian planets. In 1880, Forbes declared that computation showed there were two or three, and he predicted their positions. Between 1884 and 1892, Roberts, a most expert astronomical photographer, made many photographs of the heavens suspected to contain the strangers, but found no trace of them on his photographic plates, though he announced that if there were any additional planets, they could not be brighter than 17th magnitude stars.

Of comets and meteors, space, comparatively speaking, is well filled. It has been asserted that the solar system alone has 4,000 comets, and innumerable masses of meteors, so plentiful in places that they move in streams thousands of miles in length, and along well determined orbits. The greater number of comets are telescopic, that is, they are not visible to the unaided eye. Comets are supposed to be composed of gases sufficiently hot to shine by their own light, and to be, in many cases, followed by swarms of minute particles called meteoroids. As viewed by the eye, comets are apparently divisible into three parts: the nucleus, or head; the coma, or hazy mass surrounding the nucleus; and the tail, an extension of the coma; but these are so shaded the one into the other, that not even can the telescope define where they begin or end. Meteors are usually divided into aerolites, bolides, or fire-balls, and shooting-stars, all of which have a common origin, and, usually, a common fate when they rush into the Earth's atmosphere, where friction causes them either to burn up or to explode into small fragments. Occasionally, a mass of meteoric stone or iron, falls to the ground. Analysis of these, proves them to be of extra-mundane origin, because they contain chemical combinations not found in terrestrial substances; they contain no new chemical elements, but only new combinations of the elements found on the earth. Experts can, therefore, readily distinguish an aerolite from a mineral of terrestrial origin.

The collection of statistics has been discontinued except at a few points. The arrivals at the ports of Halifax, Quebec and Montreal during 1892 were about 52,000 of whom 28,000 declared their intention of settling in Canada.

The practice of granting assisted passages to immigrants has been discontinued but there is a special vote for the purpose of promoting settlement in the North-West, out of which the Government pays a bonus of \$10 to each head of a family, and \$5 to each member of such family over 12 years; also, \$10 additional bonus to each member of the family who shall, within six months after sailing, become a settler on land somewhere in the Dominion west of the Province of Ontario, as this bonus does not apply to the old provinces.

The land on which the beneficiary settles must be taken up within eighteen months from date of sailing and must have been acquired as a homestead or by purchase from the Dominion Government or by purchase from a Railway or other corporation to whom it was granted by said Government.

RECEIPTS AND PAYMENTS CANADA.

Statement of the Receipts and Payments from the Consolidated Fund for the year ending 30th June, 1892.

The receipts from the sources of the ordinary revenue of the country are paid into what is called the Consolidated Fund, and payments therefrom are made to cover the ordinary expenses. These receipts and payments, therefore, constitute what may be considered as the regular income and expenditure of the country; receipts from and expenditure out of loans and all other extraordinary transactions being excluded.

CANADIAN BANK NOTES.

Under the new Banking Act, which went into effect 1st July, 1891, the Bank Notes of any Canadian Bank are redeemable at par in any part of Canada. Previous to this it was the custom of the Banks in one Province to charge a small commission for cashing the Notes of Banks in distant Provinces; this is now done away with.

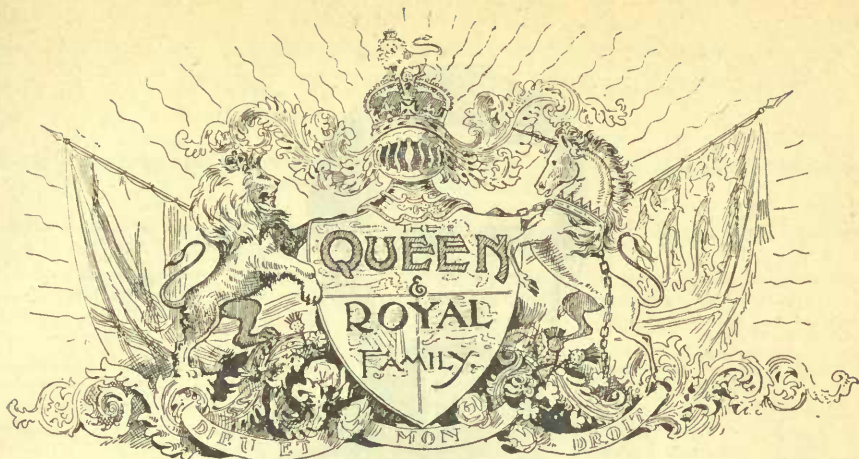

Another important point is that, under the new law it is impossible for the holders of Notes of failed or suspended Banks to lose by them, for a fund has been established, and is now in the hands of the Government at Ottawa, amply sufficient to pay the notes of any suspended Bank. This fund, which is known as the "Bank Circulation Redemption Fund," was formed by a contribution from every Bank, graded according to circulation, and should it fall below a specified amount, owing to the payment from it of the notes of a failed Bank, the other Banks of the Dominion, must again contribute to make up the deficiency. In fact, strange as it may

appear, such notes would be very likely to go to a premium at once, as by law they bear six per cent. interest from the time of the Bank's suspension until the day named for payment.

The amount of notes of any bank in circulation at any time shall not exceed the amount of its unimpaired capital, subject to penalties varying with the amount of such excess.

The payment of notes issued by any bank for circulation shall be the first charge on its assets in case of insolvency, any amount due to the Dominion Government shall be the second charge, and any amount due to any Provincial Government shall be the third charge.

Any bank, when making payment, is compelled, if requested, to pay the same, or part thereof, not exceeding one hundred dollars, in Dominion notes, for \$1, \$2 or \$4 each.

MILITIA AND DEFENCE OF CANADA.

Previous to the confederation of the Provinces, the defence of this country was entirely in the hands of the Imperial Government, who for that purpose maintained troops in each Province, supported by various local volunteer militia corps. This volunteer militia had, when called upon, rendered most efficient service in times of trouble.

After Confederation the British Government gradually withdrew all the Imperial troops from this country, and at present only maintain a garrison at Halifax, and a naval establishment there and on the Pacific coast.

By the British North America Act the command in chief of all naval and military forces of and in Canada was vested in the Queen, and the control of the same was placed in the hands of the Dominion Parliament. A Department of Militia and Defence was at the same time established, the first Minister being Sir George E. Cartier, and the first Militia Act was passed in 1868, 31 Vic., chap. 40. The Act was subsequently amended in various ways, but is practically embodied in the present Militia Act, 49 Vic., chap. 41, (Revised Statutes, 1886). By it the militia of Canada is declared to consist of all the male inhabitants of Canada of the age of 18 years or upwards and under 60, not exempted or disqualified by law, this population being divided into four classes, as follows:—

The first class comprises those aged 18 or upwards and under 30, being unmarried or widowers without children.

The second class comprises those between the ages of 30 and 45, being unmarried or widowers without children.

The third class comprises those between 18 and 45, being married, or widowers with children.

The fourth class comprises those between 45 and 60.

The following persons are exempt from enrolment and active service at any time: Judges, clergymen and ministers of all religions denominations, professors in colleges and teachers in religious orders, the wardens and officials of all penitentiaries and lunatic asylums, persons physically disabled, and any person being the only son of a widow and her only support. Certain other persons are exempt from service except in case of war.

The number of men to be trained and drilled annually is limited to forty thousand, except as specially authorized, and the period of drill is to be sixteen days and not less than eight days each year.

The Militia is divided into Active and Reserve land and marine force. The Active land and marine force is composed of men raised either by voluntary enlistment or by ballot, and the Reserve force consists, practically, of the whole of the efficient men not serving in the Active Militia of the time being.

The period of service is three years.

The strength of the Active Militia (including a Permanent Force, limited by the present Militia Act to 1000 men) was, in the year 1893:—Cavalry, 2,168; Field Artillery, 1,345; Garrison Artillery, 2,099; Engineers, 90; Infantry, 28,710; Total, 34,412.

THE LAKE ST. JOHN TERRITORY.

The territory in question extends from the head of navigation of the river Saguenay, at Chicoutimi, to the northern boundary of the Province of Quebec, a distance of 220 miles, and from the sources of the waters flowing into Lake St. John, from the East, to the river St. Maurice, and embracing the valley of the river Batiscan, a distance of 200 miles, the whole forming an area of 44,000 square miles, or about 28,000,000 acres. Comparatively little is known of this great country, with the exception of the valley of Lake St. John, which, within the last few years, has been colonized with great rapidity, and now contains a population of some 40,000.

The Saguenay and St. Maurice regions are already the field of large lumbering operations, estimated at 60,000,000 feet, B.M., per annum, or equivalent to about one-fourth of the whole export of sawn lumber from the port of Quebec.

The Soil

Is almost universally composed of a rich grey clay, the land seems to be inexhaustible. At Pointe-aux-Trembles I was shown a field of wheat, which had been producing that grain for the last fifteen years, without the application of any manure ; and the grain I saw this year was as fine as any to be found in this district. Truly one is struck with wonder at the richness of the soil, for I believe there is none richer in Canada.

Climate of Lake St. John.

Comparison between the temperature, the rain-fall and snow-fall at Roberval and at other places in Canada, for each month, each winter season (from January to March inclusively) and each summer season (from July to September inclusively.) The observations for Roberval extend from April 1888 to May 1890, inclusively ; those for Moose Factory, James Bay, from the year 1877 to the year 1882. All these observations are taken exclusively from the official reports of the Meteorological Department at Toronto.

POSTAL INFORMATION.

Letter Rates, &c.

Canada.—Letters posted in Canada, addressed to any place within the Dominion, 3 cents per oz. If unpaid, such letters cannot be forwarded, but will be sent to the Dead Letter Office. If partially prepaid, the letter will be forwarded to its destination and double the deficiency charged on delivery. Letters mailed at any office for delivery at or from the same office, provided that the office is not one at which free delivery by letter carriers is established, are charged 1 cent per oz., and must be at least partially prepaid; otherwise they are sent to the Dead Letter Office. Letters of this nature mailed at and for delivery from an office at which there is a free delivery by letter carriers are liable to 2 cents per ounce. All postage must be prepaid by Postage Stamps.

Post Cards.—From any place in Canada to any other place in Canada or to the United States, 1 cent each. British and Foreign, 2 cents each.

United Kingdom.—Postage on Letters, 5 cents per $\frac{1}{2}$ oz., whether by Canadian or New York Steamers. If sent unpaid, double postage will be charged.

Newfoundland.—Letters, 3 cents per oz. Newspapers, from office of publication for subscribers, free. Other matter same rates, etc., as to United Kingdom.

Bermuda.—Letters, 5 cts. per $\frac{1}{2}$ oz. Newspapers and printed matter generally, 1 cent per 2 oz.

United States.—The rate on letters to the United States is the same as in Canada, and at least one rate must be prepaid.

Registration of Letters.

Persons posting letters containing value should be careful to require them to be Registered, and to obtain from the Postmaster a certificate of receipt for Registration.

The charge for Registration (use Registration Stamp), in addition to the Postage, is, on all classes of matter, five cents.

Both the Postage charge and Registration fee should, in all cases, be prepaid by stamp.

Registered Letter Stamps have been issued of the denomination of 5 cents, which may be obtained at any Stamp Agency.

Registration Stamps cannot be used in payment of postage.

Registration is not an absolute guarantee against the miscarriage or loss of a Letter; but a Registered Letter can be traced where an Unregistered Letter can not, and the posting and delivery or non-delivery can be proven.

Book Post, &c.

A Book Packet may contain any number of separate books. Limit of weight for domestic post, 5 lbs. (unless consisting of a single book, in which case a weight of 7 lbs is allowed); for foreign post, 4 lbs. Limit of size, two feet in length, or one foot in width or depth.

Book Packets must be open at both ends or both sides, and must not contain any letter or sealed inclosure.

The rate on Book Packets between any two places in Canada is 1 cent per 4 oz., which must be prepaid by stamps.

The rate to Great Britain and the United States is 1 cent per 2 ozs.

Rates of Postage on Letters and Newspapers for Foreign Places.

The rates on letters and newspapers for all parts of the world (see exception for United States and Newfoundland) are 5 cents per $\frac{1}{2}$ oz. for letters, and 1 cent per 2 ozs. for papers.

Miscellaneous Matter.

Miscellaneous matter, described as under, may pass between places in the Dominion of Canada upon prepayment of the rates indicated below. The regulations of the British Post Office do not admit of the transmission by mail to the United Kingdom (or other countries beyond the sea) of miscellaneous matter as such; but a great part of the matter referred to under that head may be forwarded to the United Kingdom by Book Post:—

1. On all pamphlets, occasional publications, printed circulars, prices current, hand-bills, and other matter wholly in print, and on packages of seeds, cuttings, bulbs, roots, bedding plants, scions or grafts, the rate is 1 cent for each 4 ozs. or fraction thereof.

2. On maps, prints, drawings, engravings, lithographs, photographs when not on glass or in cases containing glass, circulars produced by a multiplying process easy to recognize, but not type-written nor in such a form as to resemble type-writing, exhibitor's entry tickets for Dominion or Provincial Exhibitions, botanical and entomological specimens when properly put up so as to prevent injury to the contents of the mails, sheet music whether printed or written, including music books whether stitched or bound (instruction books in music and instruction books in drawing accompanied by charts may however pass at Book-Post rate, which see), book or newspaper manuscript whether type-written or hand-written, printer's proof sheets whether corrected or not, such partly printed and partly written documents as deeds of land, mortgages made under seal (including chattel mortgages), insurance policies, renewal receipts when attached to the policies, insurance receipts sent in bulk from head offices to agents, militia and school returns, customs manifests, voter's lists when written or partly in writing, school or college examination papers, municipal assessment rolls, Provincial Government documents, statute labour returns, municipal returns in general, blank books, printed forms, entirely blank and printed stationery, the rate of postage is 1 cent for each 2 ounces or fraction of 2 ounces; and the postage rate must in every case be prepaid by postage stamps or stamped post bands or wrappers; provided that no letter or other communication intended to serve the purpose of a letter be sent or inclosed in any such package or thing mentioned, and that the same be sent in covers open at the ends or sides, or otherwise so put up as to admit of the contents being, if necessary, easily withdrawn for examination by the officers of the Post Office to ensure compliance with this provision; (if enclosed in sealed envelopes notched at the ends or sides, or with the corners cut off, letter rate of postage will be charged.

No packet of miscellaneous matter can be transmitted by mail if it exceed, 5 lbs. in weight, 24 inches in length or 12 inches in width or depth.

Legal and commercial papers generally (including Bank Pass-Books) are liable to letter rate of postage, except when sent as parcels by Parcel Post, and the exceptions above given to matter of that class are restricted to the documents specified, such as Deeds and Insurance Policies.

Newspapers and Periodicals.

Newspapers and periodicals *printed and published in Canada*, and issued not less frequently than once a month from a known office of publication to regular subscribers or news agents in Canada, the United States and Newfoundland, are sent free; and such newspapers and periodicals are to be put up into packages and delivered into the Post Office, under such regulations as the Postmaster-General may from time to time make.

On all newspapers and periodicals posted in Canada, for delivery in the Dominion, other than those addressed to regular subscribers or news agents, from office of publication, the rate will be *one cent per 4 oz.*, to be invariably prepaid by Postage Stamp.

Newspapers and periodicals weighing not more than 1oz. each may be posted singly, if prepaid by Postage Stamp 4 cent each.

The postage on specimen newspapers and papers and periodicals published less frequently than once a month is one cent per lb.

British and foreign publications received by mail may be re-posted in Canada to subscribers at the rate of 1 cent per lb.

Transient Newspapers.

Transient newspapers and periodicals include all newspapers and periodicals posted in Canada, *other than Canada newspapers sent from the office of publication, and British newspapers posted by news agents for regular subscribers in Canada.* When addressed to any place within the Dominion, or the United States, they must be prepaid the following rates by Postage Stamp:—

If weighing not more than 1 oz., half a cent each.

If weighing over 1 oz., one cent per four oz. or fraction of four oz.

On transient newspapers addressed to the United Kingdom the rate will be one cent per 2 oz.—to be prepaid by Postage Stamp. *Canada newspapers posted from the office of publication* to subscribers in the United Kingdom—sent in the Mails forwarded by Canadian Packet or via New York must be prepaid by Postage Stamp at the transient paper rate of one cent per 2 oz. The English Post Office requires *each newspaper or periodical* to be prepaid by postage stamp. If sent in packages the English Post Office declines to deliver them.

The packet may bear on the *outside* the address of the sender, in addition to the address of the person for whom it may be intended; and also a trade mark or number, and the price of the sample enclosed; *inside*, there must be no enclosure but the samples or patterns themselves. The particulars, however, of the trade marks, numbers, and prices may be marked on the articles themselves instead of on the outside of the packet, at the option of the sender.

Goods sent for sale or in execution of an order, however small the quantity may be, or any article sent by one private individual to another, which are not actually trade patterns or samples, are not admissible.

United Kingdom and United States.

Patterns and Samples of Merchandise, when addressed to places in the United Kingdom must not exceed 5 lbs. in weight, and to the United States 8 oz., and must be prepaid by postage stamp at the following rates:—1 cent per 2 oz. or fraction of 2 oz., with a minimum prepayment of 2 cents covering a weight of 4 oz.

Patterns and Samples within the Dominion.

Patterns and Samples of Merchandise and Goods for sale, not exceeding 24 oz. in weight, may be posted in Canada, to be forwarded to any place within the Dominion, on prepayment by Postage Stamp of a rate of 1 cent per 4 oz., under the following regulations:

If insufficiently prepaid the packet will be forwarded charged with double the deficient postage, provided the deficiency does not exceed 5 cents.

Packages of Samples and Patterns, addressed to any place in Canada, may be registered by affixing thereto stamps to the value of 5 cents in addition to the postage rate, and provided such packet be handed into the Post Office for registration.

Patterns or Samples must be sent in covers open at the ends, so as to be easy of examination. Samples, how-

ever, of seeds, drugs, &c., which cannot be sent in open covers, may be enclosed in bags of linen, or such like material, fastened in such a manner that they may be readily opened.

Useful Hints.

Register all valuable letters. Transmit money by Money Orders. Make complaints and inquiries in writing, and address the Postmaster-General at Ottawa. Preserve, and request correspondents to preserve, envelopes of missent or delayed letters. Send to the Postmaster-General envelopes of letters about which you seek information or make complaint. In addressing letters add the name of the *County and Province* in which the office addressed is located. Place stamp on the right hand upper corner of the address side. Put your own name and full address in or on letter, to insure return if it cannot be delivered. In affixing postage stamps moisten the envelope, *not the stamp*. When stamps are moistened the gum is apt to be removed.

Parcel Post.

The charges on Parcels by the Parcel Post to places within the Dominion, is 6 cents for every 4 oz. or fraction thereof (with 5 cents additional if Registered). No letter must be inclosed; if any discovered, the amount paid will be forfeited, and the Parcel charged at unpaid Letter rates. No Parcel must exceed 5 lbs. in weight, and must be prepaid by stamps.

Eye-glasses and spectacles may be sent by mail when properly put up and prepaid by Parcel Post or as fifth class matter.

Parcel Post with the United Kingdom, Newfoundland and other British Colonies and Foreign Countries.

Closed parcels may be exchanged with the United Kingdom, Newfoundland and most foreign countries and British colonies under the following regulations:—

1. The dimensions of a Parcel must not exceed 2 feet in length by 1 foot in width or depth.

2. A Parcel must not contain any explosive, combustible, or dangerous articles, nor any article of a perishable or fragile character, nor liquids or matters likely to injure other Parcels or mail transmissions.

3. All Parcels must be securely and substantially packed and closed.

4. Each Parcel must be plainly directed, and such direction must include the name and full address of the person for whom the Parcel is intended.

5. For each Parcel the sender must fill up a Customs Declaration. On this form the sender will supply an accurate statement of the contents and value of the Parcel, also the address thereof, with signature and place of abode of the sender. The Customs Declaration must be securely affixed by mucilage or paste to the Parcel to which it relates.

Parcels from the United Kingdom or any other place beyond the Dominion will be liable to Canadian Customs duties, and under existing regulations must be examined for the purpose by an Officer of the Customs in the presence of the persons addressed.

Rates and limits of weight vary. See Postal Guide, or enquire at Post Office.

Prepayment by postage stamp is required in all cases. Parcels must be handed to the Postmaster; in no case should they be dropped into a letter box or other receptacle for mail matter.

Fifth Class Matter.

Postage rate one cent, per ounce or fraction of an ounce, to be prepaid by postage stamp. Miscellaneous articles of merchandise, including seeds, bulbs, etc., to United States, and generally all matter permitted to pass by mail in Canada, which is not of the nature of a letter, and therefore subject to letter rate of postage, and not entitled to be posted at a lower rate than 5th class under one or the other classes, may pass as 5th class when addressed to any destination within the Dominion or United States. Fifth class matter must be so packed or put up as to be opened to examination of contents and must not exceed 5 pounds in weight, nor 2 feet in length by 1 foot in width or depth. When passing between Canada and the United States it will be subject to Customs regulations if liable to duty. The registration charge on 5th class matter is 5 cents in addition to postage.

Money Orders.

In sending money by mail it is always best to transmit by Money Order if possible.

Commissions on Money Orders.

On Money Orders drawn by any Money Order Office in Canada on any other Money Order Office in the Dominion, the Commission is as follows:—

If not exceeding.....\$	4.....	2 cents.

There being a direct exchange of Money Orders between the Dominion of Canada and the countries and British Colonies distinguished by an asterisk (*), Orders drawn upon these countries and colonies are paid in the full amount for which drawn. Orders upon other countries and colonies, not so distinguished, are, however, subject to a small abatement on payment.

Money Orders on the above countries are drawn in Canadian Currency. Tables showing the sums payable in other countries where the money is of a different denomination, on Orders issued in Canada, will be found below:

STEAMSHIP AND STEAMBOAT LINES IN THE DOMINION OF CANADA.

NOTE.—The numbers opposite each line of steamboats correspond with the numbers used in the list of Post Offices and Railroad Stations following. Inasmuch as steamboat lines are not fixed as are railroads but are constantly changing, this list must be used by shippers and travellers with caution.

As this list of Steamboat and Steamship Lines is entirely new, the publisher begs that those who use it will kindly help him to make it more perfect by sending corrections, additions or criticisms to Editor CANADIAN ALMANAC, 9 Front Street, West, Toronto.

A thick mark signifies that the line is subject to interruption by the Seasons—Winter—in some parts of the country, low water in other parts "d" or "Daily" means every day except Sunday.

POST OFFICES AND RAILROAD STATIONS

IN THE DOMINION OF CANADA.

The Offices printed in Italics are authorized to grant and pay Money Orders. The Offices marked * are Savings Bank Offices. Capital letters on right of the Electoral District column indicate the several Provinces of the Dominion, thus:—O, Ontario; Q, Quebec; N S, Nova Scotia; N B, New Brunswick; P E I, Prince Edward Island; M, Manitoba; B C, British Columbia; Alta, Alberta; Assa, Assiniboia; Atha, Athabasca; Sask, Saskatchewan.

The numbers and names placed opposite every place indicate the Railroad or Steamship line on which the place or nearest railway station is situated. See list of Railroads and Steamboats on pages 99 to 101.

The thanks of the publishers are due to E. W. Bullinger, Esq., for his kind permission to use "Bullinger's Postal and Shipper's Guide for the United States and Canada" in the preparation of the following list:—

INSANITY AND CRIME.

By DR. DANIEL CLARK.

Insanity is a disease which has afflicted to a greater or less extent every known nation in every clime and in all ages. It has been looked upon by the wise and ignorant alike as being purely a disease of the mind, and by many races has being inflicted by devils because of moral guilt.

As medical light increased, it was seen that both saint and sinner were exposed to its malign influence, and that instead of being demon-held, such were the victims of physical disease as much as were those sick with lung or heart disease.

As a result remedial agency took the place of charlatanism, and kindness to these sick ones succeeded cruelty and even banishment from the abodes of men, "That charity which suffereth long and is kind," took the place of acts bordering themselves on diabolism.

To exorcise the imaginary demons, vile purgations, savage blistering, copious and frequent bleeding, tri-daily whippings, plunging into cold water in iron cages, chains, filth the most abominable, food the most repulsive in its rottenness, dark underground cells covered with the mould of many years, bruises and sores the most loathsome, and criminal and depraved guards of vicious habits taken from the gaols, are only statements of historic facts which merely epitomize the sufferings of the insane, and what they endured for seventeen long centuries since the beginning of the Christian era. All these outrages were permitted and committed because of ignorance and mistaken notions in respect to devil-possession.

It is only a little over a century since the true explanation of the varied causes of insanity began to make its influence felt in Christendom. Pinel and Esquirol in France, Tuke and Connolly in England, were the apostles of this great reform which revolutionized the treatment of the insane. Strange to say, at that recent day they were persecuted and ostracised from society because of their beliefs which antagonized accepted dogma.

Like true reformers they persevered in their God-like work, and as a result, mere dungeons and houses of detention were exchanged for curative hospitals. All that was found necessary to restore the stricken body and mind to their normal condition was brought into requisition, as far as medical knowledge extended.

Within the last quarter of a century more advance has been made in the intelligent treatment of the insane, than in all the preceding centuries of human history. Researches into the relative growth of mind and brain, comparisons of mental capacity and nerve complexity and tone, the life history of insane individuals and of their progenitors are noted in relation to diseased conditions of the nervous mechanism, experiments on living organisms and the functional results flowing therefrom, have thrown floods of light on psychic and bodily co-operation and manifestation.

Mere attempts through metaphysical speculation and enquiry to obtain definite knowledge of the underlying facts which produce the multifarious phenomena of

mind, and upon which its existence depends were "love's labour lost."

For over 4000 years literature has been full of all kinds of opinions as to mind and its operations, yet not one iota of definite discovery has been put on record during the centuries of the study of self. During the last quarter of a century physiologists and more especially biologists have been directing their enquiries to bodily conditions and functions, and thus slowly endeavouring to reach the higher truths from the observation and study of the grosser and lower organisms in their upward development, rather than indulging in transcendental speculations or metaphysical subtleties which have produced so far no definite results. As was to be expected, the researches of modern investigators have extended to insanity and its causes, and which have widened our knowledge very much in that direction.

This advance, as is usual, has led to too rapid generalization and more than the facts warrant. This is strikingly seen in the attempt to tabulate causes of insanity and to draw conclusions therefrom, not warranted in the premises. The pendulum of speculation usually swings from one extreme to the other. Tables made out on this basis must of necessity be very fallacious. The factors which enter into presumed causes may be very obscure or they may only be occasions which merely make manifest the deterioration which has been latent and comes to the surface under favourable conditions. The magazine of gunpowder is harmless as granite until a spark is applied, which sets in action the explosive force, so a physical condition of bad tendency may give no sign until some excitant rouses the malign latency into activity.

When so-called causes are cited and classified, it is often forgotten that heredity is not, properly speaking, a cause but merely a liability. At the same time it is safe to state that at least 40 per cent. of all the insane by virtue of this predisposition come into life handicapped because of unfavourable conditions of existence.

In short, they possess this heritage of woe from the cradle to the grave. It is an inherited weakness in the great nerve centres which leads to idiocy, imbecility, or insanity when overstrained. Bad environments, unhealthy food and air, violations of the general laws of health, brain tension and such like, added to a bequeathment of heredity, accomplish mental dethronement.

Heredity is the long delayed punishment for outraged natural law in successive parentage from generation to generation until extinction takes place.

In estimating causes two or three combined may produce one result, but which separately might be comparatively harmless. For example, heredity and worry, injury to the head and sun-stroke, intemperance and want, religious or political excitement and one or more of the various diseases which impoverish the physical system, may in a cumulative way unhinge reason. It may be transmitted tendency plus any exciting cause of

the multitude which exist and operate in our complex condition of society.

It will then be seen that tables of so-called causes are practically worthless, except in a general way. Equally unsatisfactory are the conclusions which are drawn with great positiveness based upon these statistics.

Of course, to the medical profession it is of paramount importance to ascertain and consider all the factors of an untoward nature, which singly or generically may, and do contribute to produce unsoundness of mind.

To the teaching profession it is of no less moment to keep in view the characteristics, mental capacity, physical strength and brain-dynamics of children at a susceptible age, when over mental pressure in many children means ruin in after life. Natural exercise of the mind along normal lines leads to mental robustness, as much as muscular gymnastics promote physical strength, but overstrain in both, induce loss of tone and in the end enfeeblement.

It is largely among this class of children that overstudy at school makes its greatest havoc. The brain as the organ of the mind is overtaxed in the struggle for preeminence. This delicate organ is put to its highest tension and crowded to its utmost capacity in study, especially in memorizing during its formative stage of growth. This instrument of cells and fibres is roused to its best efforts at a killing pace, to satisfy a teacher's ambition or a parent's pride, or it may be a pupil's love of praise. No one would dream of thus unduly testing the muscles or the other organs of the body during juvenile growth, yet the brain is one of the workshops in the body, subject to the same general law of recuperation, rest and decay, as are all the other laboratories in this wonderful factory of humanity.

It is true that much has been done in recent years to reduce the hours and days of study among the younger children in our Provinces; at the same time, the number of new studies is increasing, so the gain is more apparent than real. The mere committing to memory of didactic studies is a tremendous mental strain on young children when pushed to excess. To them, much of what is required has no more definite meaning than has Sanscrit to a Zulu. If such young brains have inherent degeneracy then undue stuffing means in the long run dwarfage of mind-power, not only in youth but also in adult years. When disease sets in, then is there grafted into the system one or more of a brood of nerve troubles including insanity and generally of a hopeless kind.

This subject is also of importance to the teachers of religion and ethics in our country.

It needs little observation to know that as a rule the criminal classes are largely recruited from that stratum of society in which is low intelligence, and as a consequence feeble moral judgments to guide and control conduct.

This is especially true of that class whose mental training has led to trampism, bestiality and petty crimes.

Social reformers differ in respect to the degree in which education of an intellectual stamp alone controls criminal propensities and restrains insane tendencies. Education is one-sided which is purely a drawing out of the knowing part of the mind.

Mental enlightenment must take into account the development and direction of the whole being, animal, intellectual and moral. Such training along normal lines does much to prevent crime, and keeps in subjection the tendency to mental diseases. Even when the infliction is manifested, there is more hope of reform and recovery in the person of each member of these two classes than in those possessed of lower mentality. Our great hope lies in physical renewal, mental growth through education and the creation of better habits along moral lines; many criminals are more weak than wicked, and are lacking in good qualities rather than being positively wicked.

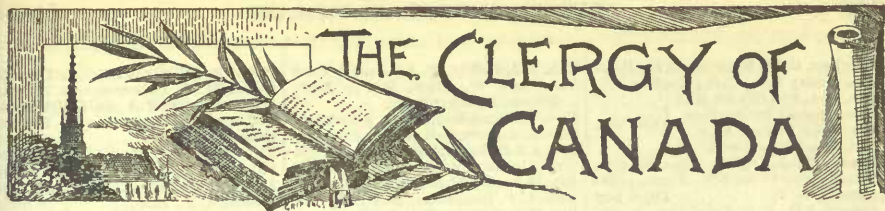

We find such natures prone to that form of insanity which borders on imbecility. There is a border-land in which mingle the culprit and the semi-dement: the man of congenitally weak morals, and the man of naturally deficient intelligence. Both are a menace to society, but from two different points of view in some ways, yet, having much in common.

The ever increasing army of defectives in America and Europe supported by the tax-payers, has led to serious thought, not only among political economists but also by the Governments who control expenditure.

Take for example the Dominion in which there are about 15,000 insane persons. This means an expenditure from the taxes of the different Provinces of nearly \$2,000,000, and the necessity for this outlay is ever increasing, not only because of the augmentation from our native and resident foreign population, but also because of the annual influx of so many weaklings from European countries, who have no legal claim upon our bounty, so their immigration should not be allowed. It is cheaper for Parochial Boards and municipalities to ship to a distant country the idiotic, the imbecile, the insane, and the chronic vagrant, than to provide for such until death, at home.

The total number of insane in the Province of Ontario for 1892, in our asylums was 4,073 persons. Of these there were 2,031 women, and 2,042 men. In the sum total are included 486 idiots and imbeciles. The cost to the Province was \$519,052. In addition to the above total are those insane, who are provided for at home or are in private institutions. The Dominion census commissioner is credited with the statement that in the Province of Ontario only 59 *per cent.* of its insane are in our asylums. This is doubtless an error, and it is possible it may have arisen from patients having belonged to households, and were entered as resident in them when such were in asylums.

It needs little observation to know that there are not 41 *per cent.* of the insane at large in this Province. In fact, half that number would be more correct. That would give one out of every five as the proportion at large. At one time the insane were found friendless and homeless in almost every town and village, and wandering along country roads when driven from the haunts of man; now such are only seen occasionally, and only for a short time, as they soon gravitate to one or other of our asylums. It is a libel on the Province of Ontario to state that it is behind any other Province of the Dominion in the provision it has made for the accommodation of the insane, doubtless based upon erroneous statistics.

The Blue Ensign.

THE FLAG OF OUR COUNTRY.

BY COLIN CAMPBELL,

Assistant Paymaster, R. N. (Retired).

The national flag is the emblem—the visible and universally recognized bond of union—of a people as a whole, irrespective of, and superior to all sectional, race, or religious distinctions. It symbolizes the life of the nation, and its absolute unity.

The national flags of the Dominion of Canada are, in the first place, those of the British Empire at large; and these emblems, with the modifications to be presently described, consist of: first, the Royal Standard of the sovereign; secondly, the Union Jack, and the different Ensigns embodying it.

Over every fortress, garrison, and ship of this Empire, floats the Union Jack, that well-known combination of the crosses of St. Andrew, St. George and St. Patrick.

The Royal Standard is the personal banner of the sovereign, and is flown wherever she is in residence ashore, and at the main mast-head of any of Her Majesty's ships upon which she is embarked; and it is displayed on the anniversaries of her birth, accession and coronation, over all fortresses, a royal salute being fired at noon on those days. Each member of the royal family uses the royal coat of arms, with appropriate heraldic distinctions. Over the chair of state which typifies the throne, used by the Governor of each Colony in opening and closing its legislative sessions, is the royal coat of arms. The Princess Louise, when her husband the Marquis of Lorne was Governor-General of Canada, sat beside him on these occasions, her own coat of arms being displayed above her chair of state. Her royal standard was likewise flown, instead of the Union Jack, over the Government House while she was in residence there, and the sovereign's standard was hoisted instead of the red Ensign over the Parliament Building at the opening of the session.

The national colours and emblems must now be more particularly explained, under the regulations which respectively govern their appropriate uses, in civil life, in the military service, and in the royal navy and the mercantile marine; also the badge or coat of arms specially authorized for the Dominion.

either obligatory or prohibitory. The use of national flags or emblems—like so many other matters under the easy-going British constitution, which wisely avoids all undue interference with the liberty of the subject, or needlessly repressive enactments—is almost entirely a matter of usage. The royal arms are placed above the Supreme Court bench, and they may figure above a hair-dresser's window. In this country there is not, as in England, a tax levied upon heraldic devices, consequently no legal restriction exists as to their use; and the adornment of a cabman's panels with the royal emblems would only be deemed more creditable to his loyalty than to his good taste. On all festive occasions we see displayed from flag-staffs, and festooned across our streets, a promiscuous collection of the royal standard, the plain Union Jack, the white Ensign of the royal navy, the blue of other Government vessels, the red of the merchant service, and the Union Jack with a white border—which is simply the signal for a pilot!

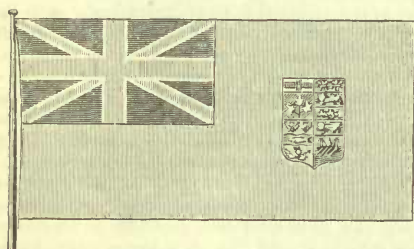

Throughout the great Province of Quebec, and wherever our French-Canadian fellow-citizens congregated, there is always a profuse display of the tricolor of the French Republic. This sentimental tribute to the ancient glories of their race has never been deemed a cause of variance by their fellow-subjects of British descent; but, however natural and void of offence, this constant use upon public and private occasions of the tricolor may be, its display alone, and even without any emblem upon it specially denoting Canada, is that of the national flag of a foreign state, and is moreover, historically speaking, an anachronism. The flag to which their forefathers bore allegiance was the white flag with the fleur-de-lys thereon; and its being displayed to-day would be as much an historical reminiscence as the use of the plain blue banner with white cross of St. Andrew by the descendants of Scotchmen. But the tricolor is the flag of a later Government, to which, although the flag's constant use would plainly appear to denote allegiance, the French-Canadians never owed any fealty; and these colours became a national emblem some time after their people had thrown in

I. IN CIVIL LIFE.—Here there is no written code.

their lot very loyally with an empire that they have since shed their blood to maintain, and have gallantly and victoriously defended against an invading army. Their fellow-countrymen understand that the flag which they use is a race or family emblem, more than a national one, and that in any emergency, they will be found still true to the empire within which their forefathers found more civil liberty than under the old Kingdom of France, and where, as so many expatriated clergy testify, they now enjoy more religious freedom than is to be found within the French Republic of to-day.

Immigration constantly brings to our shores citizens of all other nationalities, who are equally free to hang out, as fancy dictates, the banners of the fatherland they have quitted to take a share in this broad and prosperous Dominion; and for those banners their children, while growing up into loyal Canadians, will doubtless long cherish equally loving sentiments, which all others will carefully and cordially respect.

Over the central tower of the Parliament Building at Ottawa floats, however, on all public occasions and holidays, that which is undoubtedly the only strictly accurate and appropriate national flag for display, in civil life, throughout the length and breadth of this Dominion, viz: The Red Ensign, a flag of plain red,

having the Union Jack in the upper "canton," or corner, next the mast, and the Dominion coat of arms in the "fly" or field of the flag.

The Dominion coat of arms will be referred to in detail, below.

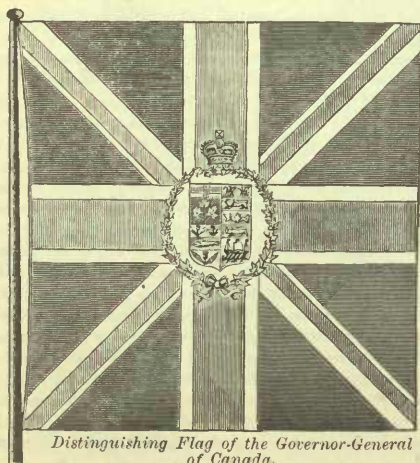

Over Government House, or other official residence for the time being, the Governor-General flies a plain

Union Jack, with the Dominion arms on a shield in the centre, and Her Majesty's ships are ordered to hoist the same at the mast-head when he is on board, as will be seen under the heading of the naval service. To the writer, it would seem evident that *this* is the flag which should fly over the Parliament Building, when His Excellency opens the session *in person*, but such is not the usage. On holidays and other public occasions, the Dominion red Ensign is undoubtedly the proper flag to be hoisted there.

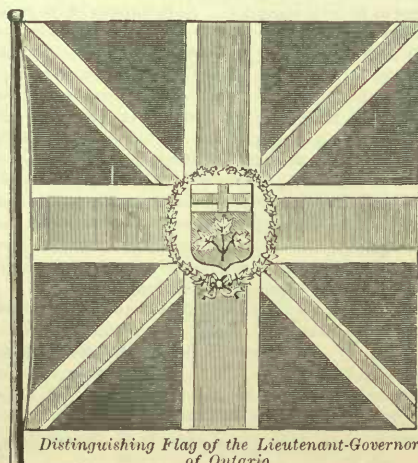

II. IN THE MILITARY SERVICE of the Empire, rules the most exact and punctilious in regard to flags, as well as to honours and salutes of all kinds, are necessarily very rigidly enforced. These are defined in the Queen's Regulations and Orders for the Army. The following are the main points of general interest:

a. *Standards and Colours of Regiments.*—The standards and guidons (the latter a modified swallow-tailed form of the standard) of regiments of Cavalry—Dragoons only—are minutely described as to their materials, dimensions and devices. They are of a crimson colour, with the royal or other title, and authorized badges and devices, thereon. They are carried by troop serjeant-majors, and are uncovered only in "review order" and during parade movements. Standards are not carried by regiments of Hussars and Lancers; their badges and devices are therefore borne on their appointments.

The Royal or first colours, also called the Queen's colour, of each of the three regiments of Foot Guards, are crimson, with appropriate distinctions; their regimental or second colour is the Union Jack,—or, as officially described, "the Great Union, the imperial colour of the United Kingdom of Great Britain and Ireland, in which the Cross of St. George is conjoined with the Crosses of St. Andrew and St. Patrick, on a blue field"—and bears one of the ancient badges conferred by Royal authority. The Queen's colour of every other regiment of Infantry is the Great Union, having in the centre the territorial designation and regimental title, surmounted by the imperial crown. The Regimental colour is of the colour of the facings, except in regiments faced with white, whose second colour is the Red Cross of St. George in a white field, with designa-

tions and titles displayed as on the Royal or first colour, within the Union wreath of roses, thistles and shamrocks, and ensigned with the imperial crown. The colours of Infantry are, as a rule, to be carried by the two senior second-lieutenants.

The Standards, Colours and Guidons of Regiments are emblems which soldiers are taught to regard with a respect amounting to veneration. Every part of them has a distinct emblematic significance, by means of which the Royal Prerogative (typified by the surmounting crown) discipline and obedience to command (denoted by the tassels which come from the officer's sash or "cravatte") the national constitution (in the Ensign) and the historical record of the regiment (emblazoned on the flag) are all represented, so as to place before the eye of the soldier an image of the military virtues he is required to cultivate, viz.: Loyalty to the Sovereign, Subordination to the Military Chiefs, Patriotism and Honour. Recruits are instructed in this significance; and, to impress it forcibly on the mind, officers of all ranks and soldiers are required to salute the standards and colours of a regiment whether it be their own or another.

The privilege of carrying colours can be conferred only by the Sovereign personally or by her personal representative; and no addition to or alteration in colours can be made without the Sovereign's special permission and authority signified through the Commander-in-Chief.

b. *Colours in the Canadian Militia.*—From the above it follows that the authority to bear colours is granted as a privilege, personal to the particular regiment to which they are awarded. There can therefore be no general issue or distribution of colours. Devices, badges and mottoes are conferred on regiments entirely apart from the special privilege of carrying colours. Such devices as appear emblazoned on the colours only are representing the identity and historical record of the regiment.

c. *Flag Stations.*—The Queen's Regulations contain the list of military stations at which it is ordered that the national flag (the Union Jack) shall be used either daily or on particular occasions. Successive Sovereigns have specially authorized the use of the Royal Standard at certain stations, and these also are specified in the Queen's Regulations.

Similarly the stations in Canada (exclusive of Halifax, which is an Imperial Fortress), at which the Union Jack is ordered to be used either daily or on particular occasions, are specified in a Militia General Order recently issued which forms part of the Militia Regulations.

d. *In vessels and boats.*—So strict is the etiquette as regards the use of flags, that whereas it was customary in former years, for military officers to use the plain Jack as a boat's Ensign when visiting ships of war, etc., the first clause of the Queen's Regulations under this head, now prescribes that "the Union Jack, being the distinguishing flag of the Admiral of the Fleet, is not to be flown on military boats and vessels." War department vessels, and boats employed for staff and general military services, are authorized to carry the blue Ensign, with the device of crossed swords on the flag. The device on flags of submarine mining boats is a hand issuing from a mural crown and grasping a thun-

derbolt. Royal Artillery and Ordnance Store service boats bear the Ordnance arms on their flag.

A special Union Jack is authorized to be flown by General or other Officers commanding stations when embarked in boats or vessels, bearing in its centre the royal initials surrounded by a garland on a blue shield, and surmounted by a crown. General Officers Commanding, who are also Governors of Colonies, when embarked in vessels or boats, are to use the distinguishing flag appointed for Governors: the Union flag with the arms or badge of the colony emblazoned in the centre thereof.

The foregoing synopsis of the stringent regulations in force, respecting the flags in use in the military service, shows clearly how improper and inappropriate it would be to display over either public buildings, society halls, or private residences, such a form of the national colours as would indicate either royal, vice-regal, or military occupation.

III. IN THE NAVAL SERVICE, the flag regulations are still more varied, more precise, and necessarily more stringent, being enforced by heavy penalties, it being very requisite that the nature of all vessels flying the British Ensign should be readily distinguishable in time of war, for their protection, as well as in time of peace for their due observance of revenue and other governmental regulations.

The Royal Navy has no counterpart in the Canadian service. On the Australian station there is a regular colonial branch of the Imperial squadron, the ships being owned, armed, equipped, officered, manned, and paid as the Royal Victoria Navy. Canada, with the fourth largest mercantile marine, in aggregate tonnage, in the world, relies entirely on the Imperial Navy for its protection, having no auxiliary Naval defence force whatever. Some years ago, the Admiralty lent the frigate "Charybdis" to the Canadian government, to be used as a training ship for the Marine Militia, which is provided for by our Militia Act, and with a view to the organization of a Naval Reserve similar to the Royal Naval Reserve of Great Britain; but the press and people of the Maritime Provinces treated the idea with contempt, and the ship, after lying for some time at moorings in St. John harbour, was returned to the Naval authorities at Halifax.

The regular Imperial troops stationed in Canada have now no duties beyond those pertaining strictly to our defence against foreign invasion, except in the event of their being called upon in aid of the Civil Power, to maintain the supremacy of the Crown. From the prompt suppression of the North-West rebellion in 1885, by our own Militia alone, called out from all parts of the Dominion in a brief but arduous campaign, winning universal admiration abroad and at home for the spirit and efficiency of our citizen soldiery, this would happily appear to be an extremely remote contingency. Nor does the General Officer commanding Her Majesty's forces exercise as such any active control in this country in time of peace, even over our Militia service when not mobilized with the regular troops under special Dominion authority. The Royal Navy on the other hand, possesses, under the Merchant Shipping Act of Great Britain, jurisdiction in certain matters of the mercantile marine of the Empire at large, and among others (which need not be here referred to) in

regard to the flags and pendants to be used by the merchantmen and Government vessels also of the Colonies, as will presently be seen. The power of active interference with improper colours hoisted upon vessels is, however, likewise vested in Military Officers, Customs officers and, in foreign ports, in the British Consular officers.

The Royal Navy is no longer divided into the red, white and blue squadrons of olden times. H.M.S. "Duncan," flag-ship of Sir James Hope, was the last to fly the flag of the Commander-in-Chief as Vice-Admiral of the blue, on the North American and West Indian station, in 1864; she that year hoisted the white Ensign, under the present regulations respecting flags and colours, which then came into force. The object for which the different colours were formerly used was to distinguish the divisions of the Fleet, which often numbered as many as 200 sail. A variety of ensigns, however, much increased the danger of confusion in action; in order to prevent that confusion at Trafalgar, Lord Nelson ordered the whole of his fleet to hoist the White Ensign; and it was under that flag, the "Old Banner of England," but with the Union in the upper corner, that the victory was gained. Latterly, owing to the comparatively small number of ships forming a fleet, the distinctive colours became of much less importance, while the frequent change of flags was very puzzling to foreigners, leading to mistakes and inconveniences. Consequently, Her Majesty's Order in Council, of 9th July, 1864, established the regulations on this subject at present in force. The above remarks are taken from the Admiralty Book of Coloured Plates of National Flags, and the following comment, from the same source, is not without interest: "It is believed that the term 'Jack' is derived from the abbreviated name of the reigning Sovereign, King James The First, under whose direction the first Union Flag was constructed, and who signed his name 'Jacques.'" The following synopsis of the rules governing the use of distinguishing flags and colours afloat, is taken from the "Queen's Regulations and Admiralty Instructions" of the Royal Navy, rules which interest us as subjects of a world-wide Empire, as well as citizens of the vast Dominion which forms so important a part thereof.

a. Distinguishing Flags and Pendants: Navy authorities.—The Lord High Admiral has a special flag, to be worn in Ships in which he is embarked. There is now, however, no Lord High Admiral of Great Britain; his functions are analogous to those of the Commander-in-Chief of the Army; the last Lord High Admiral was William IV, who received this appointment when Prince of Wales. The office is now said to be "in commission"—its functions are performed by the Lords Commissioners of the Admiralty, a board uniting the dual control which is exercised over the land Forces by the War Office and the Horse Guards. Commissions of Naval Officers are not signed by the Queen, they are headed "By the Commissioners for executing the office of Lord High Admiral of the United Kingdom" etc.; they are signed by two of the Lords. The Lords Commissioners have a flag of their own, which is flown when any members of the Board embark in a ship of war. The Admiralty flag is red, having a yellow anchor placed horizontally in it, with the cable (of rope) running loosely through and around the anchor.

An Admiral of the Fleet wears the Union Flag (the Jack) at the main-topgallant-mast-head. An Admiral wears, at the main: a Vice-Admiral, at the fore: and a Rear Admiral, at the mizen: a plain white flag, with red St. George's cross thereon. In boats and in ships with less than three masts, the Vice-Admiral's flag is distinguished by a red ball in the upper part of the flag, next the staff; a Rear Admiral's by two such balls.

A Commodore of the First Class (that is, a Captain holding a special commission, which makes him a Commodore while such commission is in force, and no longer) wears a broad Pendant, which differs from an Admiral's flag in that it tapers gradually from the mast, and ends in a swallow-tail, at the main; a Commodore of the Second Class, at the fore. There are other minor distinctions among Officers' flags and pendants which need not be here dwelt upon.

Finally, all Her Majesty's ships in commission (that is, on service), when not bearing a Flag or Broad Pendant, wear at the main a long, narrow, pointed Pendant, having a St. George's Cross on a white field in the part that is next the mast, with a white "fly" or tail to it. And, when two or more Ships of War are together, there being no Flag Officer or Commodore present, the Senior Officer of those present wears a *small* broad pendant at the mizen, in addition to the regular ship's pendant. When a Flag Officer shifts his flag from his own Flag-ship to another vessel under his command, the latter strikes her pendant, and the Flag-ship proper hoists a plain ship's pendant for the time being.

b. Distinguishing Flags for other than Navy authorities.—The Admiralty Instructions contain very full and particular directions, when and under what circumstances, the distinguishing flags of the various Military, Diplomatic, Colonial, and Consular authorities are to be hoisted in ships and boats of the Royal Navy in which such authorities may embark. The flags thus authorized by Her Majesty to be displayed afloat are:

1.—By General and other Military Officers commanding stations, the Union, bearing in the centre the distinguishing mark already described under the military service, above.

2.—By Her Majesty's Diplomatic servants (that is, Ambassadors, Envoys, etc.), the Union, with the Royal Arms in the centre thereof, on a white shield, surrounded by a green garland.

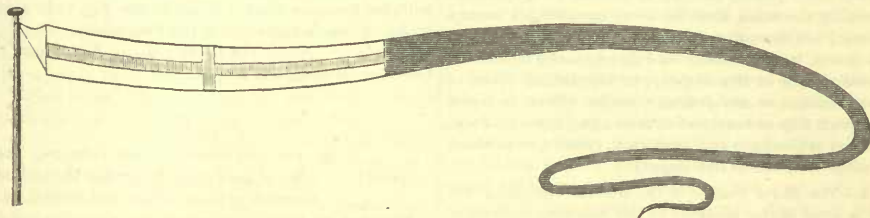

3.—By the Governors or High Commissioners of Her Majesty's Colonies and Possessions abroad, and Officers administering the government, the Union, with the arms or badge of the Colony enblazoned in the centre thereof, on a white shield surrounded by a green garland. It should be observed that the High Commissioners referred to in this clause are those administering the government of Possessions abroad, not Agents accredited by Colonial Governments to the Imperial Government, such as is the High Commissioner for Canada, in London. The arms to be thus borne on his distinguishing flag by the Governor-General of Canada, will be separately described under the heading of the Dominion coat of arms, below.

4.—By Consuls-General, Consuls, and Consular Agents, the blue Ensign with the Royal Arms in the centre of the fly thereof, that is in the centre of that part between the Union Jack and the end of the flag.

c. Colours: Navy.—All Her Majesty's Ships of War in commission shall bear a white Ensign, with the red St. George's Cross, and the Union in the upper canton, and when it shall be thought proper to do so, they may display the Union Jack at the bowsprit end.

The Union Jack, with a border of white of one-fifth of the Jack, shall be used in all parts of the world as a Pilot Flag.

d. Colours: other Government vessels.—Ships and vessels employed in the service of any Public Office shall carry a blue Ensign, having in the centre of the fly

the seal or badge of the Office to which they belong. Hired transports are to wear the blue Ensign, with the yellow Admiralty anchor in the fly, and when in charge of Naval Officers, a blue pendant with the Admiralty badge thereon. Surveying vessels (other than Ships of War employed on such service), commanded by Naval Officers, carry the blue Ensign and pendant.

e. Colours: Royal Naval Reserve.—British Merchant Ships fulfilling the following conditions, will be allowed to wear the blue Ensign:

1.—The Officer commanding the Ship must be either an Officer of the Royal Navy on the Retired List, or an Officer of the Royal Naval Reserve.

2.—Ten of the Crew must be Officers and Men belonging to the Royal Naval Reserve, the Men being entitled to be absent on leave—that is, men who are not in arrears with their drill, etc.

3.—An Admiralty warrant for the Ship to fly the blue Ensign must first be obtained.

f. Colours: Colonial Government Vessels.—The following are the regulations as to the flags to be worn by any Vessel maintained by any Colony under the Colonial Defence Act of 1865:—

1.—Any Vessel provided and used under the 3rd Section of the Act shall wear the blue Ensign, with the Seal or Badge of the Colony in the fly thereof, and a blue Pendant.

2.—All Vessels belonging to, or permanently in the service of the Colonies, but not commissioned as Vessels of War under the Act, shall wear a similar blue Ensign, but no pendant.

Canada, as before observed, has no organized Naval Defence force. When however, at the abrogation of the Reciprocity Treaty, American vessels were no longer permitted to fish in Canadian waters, the duty of protecting our territorial fisheries was entrusted to Canadian government cruisers, at first conjointly with the Ships of War of Her Majesty; but the latter were soon withdrawn, and the service was left entirely to the Dominion cruisers. These, although not commissioned as Vessels of War, were authorized by special warrant from the Lords Commissioners of the Admiralty, to fly

the long pendant. Other Government vessels of the Dominion, as above prescribed, are authorized to wear a blue Ensign, with the Dominion arms thereon, but not the pendant in addition. The Dominion arms will be separately described.

The distinguishing Pendant that is worn at the main mast-head of an armed vessel, and authorized to be flown by the Commander of the Canadian Fishery cruisers, is similar to that worn by vessels of the Royal Navy, except that its fly or field is blue, with the Ensign (red St. George's cross, on a white field)

next the mast. The pendant should be of a length to suit the height of the mast; for any size, from twenty yards long down to six yards, its breadth next the mast is to be four inches; for still smaller pendants, two and a half inches. The naval usage of prolonging the narrow end of the pendant is to make it resemble a whip-lash when seen from a distance; this was first adopted in defiance of the Dutch who had been "sweeping the seas" with brooms at the mast-heads of their vessels.

IV. COLOURS: MERCHANT SERVICE.—The Dominion of Canada was, some four years ago, seriously affected by Imperial legislation on this subject. It had become since Confederation, very customary to manufacture for use in the Dominion, both on land and afloat, a British red Ensign, bearing what was supposed to be the Dominion badge or coat of arms in the fly. The misapprehension as to the badge will be dealt with presently; but this was not all. The Imperial Act of 1889 at first precluded the wearing of any distinguishing badge at all by our vessels. The Admiralty Instructions, as now amended and actually in force, on the subject of Merchant service colours, are here given in full:

1.—In accordance with the provisions of the Merchant Shipping (Colours) Act, 1889, all other Ships and Vessels (than the Government vessels above referred to) belonging to Her Majesty's subjects, including all Colonial Merchant Vessels, shall wear a red Ensign (undefaced by any Badge or other distinctive mark), with the Union in the upper canton next the staff, except such yachts or other vessels as may have warrants from the Admiralty to display other Ensigns, Colours or Pendants.

2.—All the above Ships and Vessels shall use a British Union Jack, with a border of white of one-fifth of the Jack, as a Pilot Flag, in all parts of the world.

3.—A Colonial Merchant Vessel may carry a distinguishing flag with the Badge of the Colony thereon, in addition to the red Ensign, provided that such flag does not infringe the provisions of Section 105 of the Merchant Shipping Act, 1854. That Section is as follows:

"If any colours usually worn by Her Majesty's ships, or any colours resembling those of Her Majesty, or any distinctive national colours, except the red Ensign usually worn by merchant ships, or except the Union Jack with a wide border, or if the pendant usually carried by Her Majesty's ships, or any pendant in any-wise resembling such pendant, are, or is hoisted on board any ship or boat belonging to any subject of Her Majesty, without warrant for so doing from Her Majesty or from the Admiralty, the master of such ship or boat, or the owner thereof, if on board the same, and every other person hoisting or joining or assisting in hoisting the same, shall for every such offence incur a penalty not exceeding five hundred pounds; and it shall be lawful for any Officer on full pay in the military or naval service of Her Majesty, or any British officer of the Customs, or any British consular officer, to board any such ship or boat, and to take away any such Jack, colours or pendant, and such Jack, colours, or pendant shall be forfeited to Her Majesty."

4.—The above Section of the Merchant Shipping Act is in some degree modified by the following Sections of the Merchant Shipping (Colours) Act, 1889, under which further provision is made in respect of the hoisting of proper National Colours by Merchant Ships:

The red Ensign usually worn by Merchant Ships, without any defacement or modification whatsoever, is hereby declared to be the proper National Colours for all ships and boats belonging to any subject of Her Majesty, except in the case of Her Majesty's ships or boats, or in the case of any other ship or boat for the time being allowed to wear any other National Colours in pursuance of a warrant from Her Majesty, or from the Admiralty.

A ship belonging to any subject of Her Majesty shall, on a signal being made to her by one of Her Majesty's Ships, and on entering or leaving any foreign port, and if of fifty tons gross tonnage or upwards, shall also on entering or leaving any British port, hoist the proper National Colours.

If default is made on board any such ship in complying with the requirements of this section, the Master of the ship shall incur a penalty not exceeding one hundred pounds.

It will be seen from the above stringent regulations, that Canadian Merchant vessels were precluded from wearing any other than the plain red Ensign of the British Merchant service at large. Representations were, however, promptly made by the Dominion Government, on the recommendation of the Minister of Marine and Fisheries. As a result, the Lords Commissioners of the Admiralty, under the power vested in them by the Imperial statute, have issued their warrant authorizing the merchantmen of the Dominion to wear the special Badge of Canada in the field of their flag; they may, nevertheless, wear the plain red Ensign of the Empire, at their own option. For a country possessing such an extensive mercantile marine as does this Dominion, the desirability of universally adopting the distinguishing flag for which authority has thus been obtained, need not here be emphasized.

The following is a copy of the Admiralty Warrant, with the Imperial despatch transmitting it to this Government:

(Extract.)

LORD KNUTSFORD TO LORD STANLEY OF PRESTON.

CANADA.

General.

DOWNING STREET,

11th February, 1892.

My Lord,

I have the honor to acknowledge the receipt of Y. L. Despatch, No. 311, of the 12th of December, and to acquaint you that I caused a copy of it to be brought under the consideration of the Lords Commissioners of the Admiralty, who have issued the Warrant enclosed, which authorizes the red ensign of Her Majesty's Fleet, with the Canadian Coat of Arms in the Fly, to be used on board vessels registered in the Dominion.

(Signed)

KNUTSFORD.

Governor-General, &c., &c., &c.

(Copy.)

By THE COMMISSIONERS for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, &c.

WHEREAS, we deem it expedient that Canadian registered vessels shall be permitted to wear the Red Ensign of Her Majesty's Fleet, with the Canadian Coat of Arms in the Fly thereof,

We do therefore, by virtue of the power and authority vested in us, hereby warrant and authorize the Red Ensign of Her Majesty's Fleet, with the Canadian Coat of Arms in the Fly, to be used on board vessels registered in the Dominion.

Given under our hands, and the seal of the Office of Admiralty, this second day of February, 1892.

(Signed) H. FAIRFAX.

(Signed) FRED. G. D. BEDFORD.

By command of Their Lordships,

(Signed) EVAN MACGREGOR.

It will have been noticed that the power is likewise vested in the Lords of the Admiralty, of permitting *Yachts* to wear special colours. Under such a warrant the Royal Canadian Yacht Club and the Royal Nova Scotia Yacht Squadron have long enjoyed the privilege of flying the Blue Ensign, and the Royal Hamilton Yacht Club has also recently been authorized to do so. Applications of Yacht Clubs for warrants to wear special colours should be addressed officially (with particulars as to numbers, tonnage, etc., of the vessels) to: The Secretary of the Admiralty, Whitehall, London, S. W., England.

From a copy of the Constitution of the Royal Nova Scotia Yacht Squadron, kindly furnished by Lieut.-Col. Arthur E. Curren, A.D.C., we have made the following extracts, which will prove of interest to every Yacht Club and yacht owner in the Dominion:—

(Extract.)

THE EARL OF KIMBERLEY TO THE MARQUIS OF LORNE.

CANADA.

No. 127.

DOWNING STREET,

14th August, 1880.

My Lord,

I take this opportunity of informing you that Her Majesty has been graciously pleased to approve of the Nova Scotia Yacht Squadron being permitted to use the prefix of "Royal."

(Signed)

KIMBERLEY.

By THE COMMISSIONERS for executing the office of Lord High Admiral of the United Kingdom of Great Britain and Ireland, &c.

Whereas, we deem it expedient that vessels belonging to the ROYAL NOVA SCOTIA YACHT SQUADRON shall be permitted to wear the Blue Ensign of Her Majesty's Fleet, and also a blue burgee with the distinguishing mark of the squadron thereon, namely, a red cross of St. George, edged white, and the arms of the old Province of Nova Scotia in the upper corner,

We do, by virtue of the power and authority vested in us, hereby warrant and authorize the Blue Ensign of Her Majesty's Fleet, and a blue burgee with the distinguishing mark of the Squadron thereon, to be worn on board the respective vessels belonging to the Royal Nova Scotia Yacht Squadron accordingly.

Given under our hands, and the seal of the Office of Admiralty, this ninth day of November, 1880.

EXTRACT FROM ADMIRALTY CIRCULAR LETTER LMM,
1st August, 1878.

In all applications for Warrants for Vessels required by the Act to be registered, it is essential that the following particulars be stated:—

Name of Vessel.	Tonnage, per Register
Rig.	(to decimals).
Length, per Register.	Port of Registry.
Breadth, per Register.	Name of Owner.

Warrants are granted to the Secretaries of Clubs, and My Lords consider the Clubs responsible for the return of the Warrants. They would therefore suggest that a rule should exist in the Club, requiring the return of the Warrant whenever it becomes obsolete.

Whenever a warrant ceases to be in operation, either by the sale of the vessel or from any other cause whatsoever, it is the duty of the Secretary of the Club to return it to this Office as soon as possible in order that it may be cancelled, and each warrant should be accompanied by a statement of the reason for its return.

In the event of a Warrant being lost, the Secretary must acquaint the Secretary of the Admiralty of the same, and the letter should be accompanied by a statement from the owner of the circumstances under which the warrant has been lost.

Until Warrants are returned, or a satisfactory explanation of their non-return is afforded, fresh Warrants will not be issued.

It is requested that copies of the list of vessels of the Club may be sent to the Admiralty once a year.

EXTRACT FROM ADMIRALTY CIRCULAR LETTER LMM,
1st July, 1879.

My Lords are therefore pleased to direct that, in future, warrants are only to be issued to vessels which are registered, and in all applications from Secretaries of Yacht Clubs for Warrants to fly special colours, the exact Register Tonnage and Port of Registry of the vessel must be stated.

In this connection may be mentioned the reports, in every instance exaggerated, of ill-feeling having arisen

in some of the smaller ports of the United States, from Canadian vessels flying the British Ensign while lying there, unaccompanied by a tribute to the sovereignty of the United States, which the citizens seemed to expect, by the hoisting of the stars and stripes likewise. Unfortunately, the British flag is not treated in all parts of the United States, with that courtesy and consideration which the American colours so cordially receive from us; but it must be admitted that cases have occurred, in which our own people have been similarly lacking in politeness. It may be well therefore, to specify the law and usage on this subject. In the first place, the hoisting of the national colours over Consulates and Consular residences is a matter of international right, and any insult to the flag of a nation's official representative would be regarded as an insult to the nation itself, for which reparation, or at the least an apology would be expected from the power within whose jurisdiction the affair happened. The hoisting of foreign colours over private residences must be regarded as a matter of toleration and good taste, and in case of the profuse and frequent display of flags offensive to popular sentiment, the local authorities might not merely decline to give protection, but even regard such a display as an act liable to provoke a breach of the peace. Rightly considered and understood, on public anniversaries and holidays of the nation the display by foreigners of their own flags is regarded as a compliment. Whether they are entitled to protection on occasions such as the birth-day of their own sovereign, in hoisting their national flags, in places where hostile popular prejudices exist, seems very doubtful; foreigners are entitled to the same rights and privileges as the native citizens of countries where they are domiciled, but to no more. In any such case, discretion is certainly the better part of patriotic sentiment. In the case of a British vessel in a foreign port, the case is entirely different. She is required by law, and (as has been shown above) under a heavy penalty, on entering and leaving any foreign port, to hoist her "proper National colours," and she is perfectly within her right in flying them during the whole period of her stay, if her Master is not anxious, as a matter of economy, to save the wear and tear of his bunting. It is very customary for steamers plying as mail packets and passenger boats between two countries to fly, in addition to their proper National colours at the peak or on the ensign-staff aft, the flag of the other country at the fore; but such is a purely voluntary compliment. As a matter of necessity she carries her own colours and no other. Ships of war hoist the flags of other nations for saluting purposes on proper occasions; this international courtesy is not required of a merchantman. Our vessels sail, in the pursuit of their lawful avocations, to all parts of the globe, and it would be a manifest absurdity to require such a vessel to go to the expense of providing herself with a set of all the national colours on earth, including those of every empire of the old world and all the republics of the new.

V. THE DOMINION ARMS OR BADGE.—It will have been seen from the foregoing, that there are three forms in which the Dominion arms are authorized to be worn upon flags: in the centre of the Union Jack, as the official distinguishing flag of the Governor-General; in the field of a blue Ensign, by our Government Vessels;

in the field of a red Ensign, by the Mercantile Marine of Canada. Reasoning by analogy, and as a matter of usage in default of any legal regulation, it is very evident that, leaving all the distinguishing flags of the various Imperial and Dominion authorities to their proper uses, the special Red Ensign of Canada is the only appropriate flag for all civic and unofficial display within the territory of the Dominion. It now only remains to define the Dominion arms or badge, in regard to which a misunderstanding very generally exists on two different points, and an erroneous badge has not only been designed and adopted by flag-makers in Canada, but has been lithographed and published in various books emanating from Government Departments. The Governor-General, as has been shown, is directed to use the Dominion arms "surrounded by a green garland," but this garland forms no part of the arms. The garland laid down in the Admiralty book of flags, for the distinguishing flags of all officials, is of laurel. Upon the recommendation of our Government, however, on a report of the Minister of Marine and Fisheries, a garland of *maple* leaves for the Governor-General's flag received Imperial sanction in 1870; above the garland is the crown. Lieutenant-Governors of Provinces have, as their distinguishing flag, the Union Jack with the coat of arms of their Province on a white ground in the centre, surrounded by the maple-leaf garland, but *without* the surmounting crown. (*See engraving on page 196*). The error in making Ensigns for Dominion use has arisen from confusing the ideas of the two different descriptions of flag. The addition of the maple leaf wreath as the emblem of Canada was undoubtedly a very beautiful conception, but its use on our Ensign as an accompaniment to the Dominion badge is simply and absolutely incorrect, and, if hoisted upon a vessel would be contrary to law, and subject to the penalty. The surmounting of the Dominion arms by the Imperial crown, moreover, however loyal and natural an idea, is also officially incorrect upon the Ensign. The General commanding the troops has his distinguishing badge upon the Union Jack, surmounted by the crown; the Governor-General has the Dominion badge surrounded by a garland of maple leaves, surmounted by a crown; Lieutenant-Governors of Provinces, the Provincial badge with garland, but without the crown; the Ensign of the Dominion bears the Dominion badge and nothing more.

By permission of the Deputy Minister of Marine and Fisheries, William Smith, Esq., we have been favored, through the kindness of Mr. Vernon Nicholson of that Department, with an absolutely accurate drawing of the Canadian Ensign, which will be found in the illustrations above given.

Even as regards dimensions, etc., the details are rigidly prescribed. The shield of the red Ensign shall be printed, stamped, or worked on a red ground. The area of the shield shall in no case exceed one-fourth the area of the Union Jack of the particular Ensign in which it is used. The same proportion shall be maintained in regard to the shield of the blue Ensign, but it shall be printed, stamped or worked on a blue ground. The shield shall be placed centrally in that part of the flag which is beyond the Jack.

A second popular misconception, which has likewise been confirmed by the semi-official endorsement given

in many Departmental publications, is that the Dominion coat of arms or distinguishing badge is formed by joining, as quarterings, the arms of *all* the Provinces which form the Confederation. A glance at the engravings will show that this is not so. The King-at-Arms, the heraldic authority in London, has decided that these quarterings are confined to the first four (Ontario, Quebec, New Brunswick, and Nova Scotia) that were thus united. This ruling may possibly not prove very acceptable in the other Provinces. Our fellow-citizens of Prince Edward Island, for instance, may not understand why the Government cruisers fly a national flag in which four other Provinces are visibly represented, but their own Province not at all. Whether any modification of the present regulations may be possible or desirable, by an exercise of the royal authority or otherwise, is however beyond the present purpose to enquire. The following is the Queen's Warrant, published in the Canada Gazette of 20th November, 1869, and still in force:—

(Copy.)

THE SECRETARY OF STATE FOR THE COLONIES TO THE GOVERNOR-GENERAL.

CANADA.

Separate.

DOWNING STREET,

14th October, 1868.

My Lord,

I have the honour to enclose a certified copy of Her Majesty's Warrant of Assignment of Armorial Bearings for the Dominion and Provinces of Canada, which has been duly enrolled in Her Majesty's College of Arms, and I have to request that your Lordship will take such steps as may be necessary for carrying Her Majesty's gracious intentions into effect.

I have, &c.,

(Signed) BUCKINGHAM AND CHANDOS.

Governor-General:

The Right Hon. VISCOUNT MONCK,

&c., &c., &c.

VICTORIA R.

VICTORIA, by the Grace of God, of the United Kingdom of Great Britain and Ireland, Queen, Defender of the Faith, &c.

To Our Right Trusty and well-beloved Councillor, Edward George Fitzalan Howard (commonly called Lord Edward George Fitzalan Howard), Deputy to Our Right Trusty and Right entirely beloved cousin, Henry Duke of Norfolk, Earl Marshal and Our Hereditary Marshal of England—greeting:—

WHEREAS, by virtue of, and under the authority of an Act of Parliament, passed in the Twenty-ninth year of Our Reign, entitled "An Act for the Union of Canada, Nova Scotia, and New Brunswick, and the Government thereof," we were empowered to declare after a certain day therein appointed, that the said Provinces of Canada, Nova Scotia and New Brunswick should form one Dominion under the name of Canada. And it was provided that on and after the day so appointed, Canada should be divided into four Provinces, named, Ontario, Quebec, Nova Scotia and New Brunswick; that the part of the then Province of Canada, which formerly constituted the Province of Upper Canada, should constitute the Province of Ontario; and the part which formerly constituted the Province of Lower Canada, should con-

stitute the Province of Quebec; and that the Provinces of Nova Scotia and New Brunswick should have the same limits as at the passing of the said Act. And whereas we did by Our Royal Proclamation, bearing date the Twenty-second day of May last, declare, ordain and command that, on and after the first day of July, 1867, the said Provinces should form and be one Dominion under the name of Canada accordingly.

And forasmuch as it is Our Royal will and pleasure that, for the greater honor and distinction of the said Provinces, certain Armorial Ensigns should be assigned to them,

Know YE, therefore, that WE, of Our Princely Grace and special favour, have granted and assigned, and by these presents do grant and assign the Armorial Ensigns following, that is to say:—

FOR THE PROVINCE OF ONTARIO:

Vert, a Sprig of three Leaves of Maple slipped, or on a chief Argent the Cross of St. George.

FOR THE PROVINCE OF QUEBEC:

Or, on a Fess Wavy Gules between two Fleur de Lis in chief Azure, and a Sprig of three Leaves of Maple slipped vert in base, a Lion passant guardant or.

FOR THE PROVINCE OF NOVA SCOTIA:

Or, on a Fess Wavy Azure between three Thistles proper, a Salmon Naïant Argent.

FOR THE PROVINCE OF NEW BRUNSWICK:

Or, on waves a Lynphad, or Ancient Galley, with oars in action, proper on a chief Gules a Lion passant guardant or, as the same are severally depicted in the margin hereof, to be borne for the said respective Provinces on Seals, Shields, Banners, Flags, or otherwise according to the Laws of Arms.

And We are further pleased to declare that the said United Provinces of Canada, being one Dominion under the name of Canada, shall, upon all occasions that may be required, use a common Seal to be called the "Great Seal of Canada," which said seal shall be composed of the Arms of the said Four Provinces quarterly, all which armorial bearings are set forth in this Our Royal Warrant: Our Will and Pleasure therefore is that you, Edward George Fitzalan Howard (commonly called Lord Edward George Fitzalan Howard), Deputy to our said Earl Marshal, to whom the cognizance of matters of this nature doth properly belong, do require and command that this Our Concession and Declaration be recorded in our College of Arms in order that our Officers of Arms and all other Public Functionaries whom it may concern, may take full notice and knowledge thereof in their several and respective departments. And for so doing this shall be your Warrant.

Given at Our Court at St. James, this twenty-sixth day of May, in the thirty-first year of Our Reign.

By Her Majesty's command,

(Signed) BUCKINGHAM AND CHANDOS.

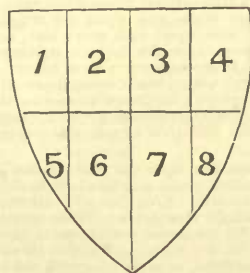

It will be observed, from the Royal Warrant, that the Great Seal of Canada "shall be composed of the Arms of the said Four Provinces quarterly; but the following is a description of the Great Seal as it actually exists: The Queen seated upon the throne, crowned, and with orb and sceptre in her hands. Placed, apparently, upon the straight stems of two young oak trees on either side

of her, the leaves and acorns showing between the shields, are four *separate* shields; upon her right hand hangs the coat of arms of Ontario, that of Nova Scotia beneath it; on her left the shield of Quebec, with that of New Brunswick below. Beneath her feet is a shield displaying her own coat of arms, without supporters, crown, or motto; in the tracery above the throne or chair of state is the motto "Dieu et mon droit." In the circular margin of the whole seal, in large letters: "Victoria Dei Gratia Britanniar; Regina, F.D. In Canada Sigillum."

The Provincial Seals are as follows: In the centre the Royal Arms, without supporters, but surmounted by the crown; surrounding the shield, the motto "Dieu et mon droit." Below this shield a somewhat smaller one, containing the Provincial coat of arms. Surrounding the whole: "The Seal of the Province of Ontario," (or whatever the Province may be).

The strangest point remains yet to be noted. Section 136 of the British North America Act is as follows: "Until altered by the Lieutenant-Governor in Council, the Great Seals of Ontario and Quebec respectively shall be the same, or of the same design as those used in the Provinces of Upper and Lower Canada respectively before their Union as the Province of Canada." From this it would seem that a constitutional right has actually been vested in the *Lieutenant-Governor in Council* of each of those two Provinces—and those alone—of altering the Provincial Seal at their own pleasure, a right not possessed by the Government of the Dominion, and the Royal Warrant prescribing the Provincial armorial bearings notwithstanding!

Mr. E. M. Chadwick, who is well versed in heraldry, observes that the combination of heraldic devices of all the Provinces, which is so commonly used, is not only unauthorized, but is quite incorrect in its usual arrangement of the quarterings. If it were proper to add a quarter for each addition to the original four Provinces, the order in which (as they now are seven in number) such quarters should be arranged is shewn in the following diagram, which is quarterly of eight: 1st and

8th, Ontario; 2nd, Quebec; 3rd, Nova Scotia; 4th, New Brunswick; 5th, Manitoba; 6th, British Columbia; 7th, Prince Edward Island—Ontario being repeated in order to make the even number, which heraldic rule requires. But if a new quarter should be added, it would take the 8th

place and Ontario would only appear once; then, if another should be introduced, the shield would become "quarterly of ten" (not nine) and Ontario would reappear in the 10th place. It is to be hoped that so manifestly inconvenient an arrangement will never be authorized. If, however, the devices of the newer Provinces should be adopted into the national arms, some of them would require to be new compositions, for the badges now in use are of an entirely different order of

heraldry from the arms of the four original provinces, and as incongruous when attempted to be combined with them as a Doric colonnade in a Gothic building.

The use of a crown, and the lion and unicorn, which is frequent in official documents of the Province of Ontario, in union with the coat of arms of the Province, is likewise unauthorized and incorrect. There are no such appendages as crest, supporters or motto to the arms of the Dominion or those of the Provinces. The same error is made by some departments of the Dominion Government at Ottawa in coupling with various Departmental designs, the royal supporters, mottoes and crown.

The badges of the other colonies of the Empire, as shewn in the official books of flags, are very diverse in appearance, some beautiful, others fantastic. They all figure in the flag-book upon circular discs, intended apparently for the centre of the Governor's distinguishing Jack. It is evident that the recognition of any Colonial badge at all upon a flag originated in this distinguishing flag of a Governor. Then, as the self-governing Colonies began to have revenue and other government vessels, came the permission for these vessels to fly the blue Ensign of the British government departments, but differentiated by the Colonial badge in the fly. Finally, this permission for the badge—or more strictly speaking, in our own case, armorial bearings—to be worn in the field of the mercantile red Ensign, has been accorded to the Dominion, which, so far as the writer can learn, is the first and as yet the only Colonial Branch of the Empire granted that privilege. Moreover, the writer believes that ours is the only instance in which Governors have been permitted to differentiate the green garland of laurel laid down for the distinguishing flags of all British representatives and officials, our Governor-General and Lieutenant-Governors as above shown, being authorized to substitute a wreath of maple-leaves. The flag-book shows the Colonial arms upon a white disc (as in the distinguishing flag of the Governor-General), except where the badge takes the form of a colored landscape that fills the whole disc, and one or two other exceptions. New Zealand, for instance, has a rectangular cross of stars on a blue field, which fills the whole disc. Victoria shows the irregularly shaped constellation of the Southern Cross, on a blue shield, surmounted by a crown; the whole upon the white field of the circular disc. Queensland, on the white circular field, has a blue maltese cross, with crown in its centre. New South Wales has, upon the white field, a red St. George's Cross, upon each arm a star, in the centre a lion. Western Australia shows a striking badge, the circular field being entirely yellow (doubtless the "or" of heraldry) with a black swan thereon; while South Australia displays a landscape of rocks and strand and sea, and Britannia approaching with open hand a naked native who sits upon a rock, wielding a spear.

The Cape of Good Hope has, upon the white circle, a full coat of arms, supporters, crest, and as a motto the name of the colony latinized: "Spes Bona." All the Colonies are thus variously represented; even little Tobago has a picture of her roadstead with ships on the water and a palm-tree on the shore, and motto "Pulchrior event." Newfoundland, as is the case with some others, uses simply a crown in the white disc, with the latinized name "Terra Nova" beneath. The flag of the Lord Lieutenant of Ireland is a harp on a blue shield, in the centre of the Jack; no surrounding white disc, garland nor crown. Similarly, the Governor-General of India has the star of India placed plainly upon the Jack, but with crown above. Several colonies, as stated, have crowns upon the white field, in various ways; but the official book of plates shows no instance of the crown *surmounting the encircling garland*, but that of the Governor-General of Canada.

The scope of this article is however restricted to a definition of the rules and usages which govern the display of

distinguishing flags and colours of the Empire at large, and the Dominion of Canada in particular. It cannot be doubted that the flag directed by proper authority to designate Canadian vessels, is that which it would conduce to the credit and standing of this country for her extensive mercantile marine to display universally. Harmony and uniformity of national sentiment would be promoted by such flag being hoisted upon all civic and other buildings on our anniversaries and other public occasions. Finally, the display of the established Ensign of Canada, over every school-house in the land, on Sundays and holidays, would tend to foster in the highest degree patriotic feelings among the youth of this country, teaching them to appreciate the status of the Dominion as a whole, and her recognized position in the British Empire—upon which may the sun never set!

It may not be out of place, before concluding this article, to offer a few practical suggestions respecting the proper mode of hoisting flags. These may be found useful in inland places, where the nautical usage cannot be seen as a model.

In many inland parts of Canada it is surprising to see the unskillful way in which the flags are sometimes hoisted. This is mainly due to the defective make of the flag-staff. The sheave or roller upon which the halyards run is placed in the body of the mast or flag-staff itself; sometimes it is at quite a little distance from the upper end, this being probably from fear of splitting the staff at the top. Either a round gilt ball, or possibly a long spear-head adorns the top, still further lengthening the look of the pole. Then, if the flag be unskillfully bent on to the halyards, allowing it to hang down just a little more, it has, when hoisted, a most slovenly appearance, seeming at a little distance to be hanging half-mast high, instead of being hoisted taut and snug to the very mast-head. The ship-shaft fashion is to have the flag-staff surmounted by a "truck" or circular cap, *flat*—on the under side at least. In this truck is the sheave; in the case of a small staff and light flag, even two holes, rounded out quite smoothly in the truck, for the ascending and descending parts of the cord to run in, will suffice. Then, if a little trouble be taken to attach the flag closely to the halyard at the upper end, it will be found to run chock up to the mast-head, and have a neat and fitting appearance that will strike the eye at a glance.

Secondly, on occasions of mourning, the Ensign has sometimes been seen not merely hoisted (or, more properly speaking, lowered to) half-mast, as a mark of sympathy and respect, but *reversed* or Union down. This latter signal, which is hoisted at the mast-head, or wherever most conspicuously visible, denotes distress in the sense of "calling for assistance" from a passing vessel. Its inappropriateness as a mark of respect is therefore self-evident.

Finally, instances have unfortunately occurred, even in the capital of the Dominion, and on more than one occasion, of misunderstanding and ill-feeling having arisen, where only courtesy was intended, by the hoisting of one national flag under another on the same halyards. In time of war, the flags are thus displayed over a captured vessel; in this fashion the U. S. frigate "Chesapeake" sailed up Halifax harbour in 1813; had the fortune of war gone differently with the gallant Americans on that occasion, H. M. S. "Shannon" would have formed part of a procession up Boston bay with flags hoisted just in the same way, though not in the same order. Too much care, therefore, cannot be exercised, in hoisting together different national emblems, on occasions either of public rejoicing or public mourning, not to fly one flag above the other. They must either be displayed upon separate flag-staffs, or exactly side by side if flown from the same staff. The display of one beneath the other conveys a direct insult, a mistake which cannot be too clearly explained, or too strongly deprecated.

Collegiate Institutes and High Schools.

Each of the High Schools (which form the intermediate link between the Public Schools and the Universities) is

managed by a Board of Trustees, appointed jointly by the County and Town Councils. In cities the Trustees are all appointed by the City Councils, except where there is only one school in the County. The Principal must be a graduate of a British or Colonial University, and certified as experienced in teaching. Assistants must also have received the prescribed training. Besides fees, local rates must be raised. Every High School with two qualified teachers receives a fixed amount of \$400, and also a certain sum on salaries of teachers, general equipment, suitability of school premises and attendance. High Schools which have an average attendance of 60 pupils, may be made Collegiate Institutes, and receive additional grant. Pupils attending these schools are prepared for Matriculation in the Universities. There were 34 Collegiate Institutes and 92 High Schools, with 22,837 pupils, in Ontario in 1892.

Public Schools.

Each Township is divided into School Sections of a suitable extent for one School; and in each of these Sections three Trustees are elected to manage its School affairs. In Cities, Towns and Villages, the Schools are managed by a Board of School Trustees elected from the Municipality. There were 5,880 Public (including separate) Schools, with 485,670 pupils, in Ontario in 1892.

Educational Museum.

Connected with the Education Department is a Museum, containing specimens of school apparatus and furniture, a valuable collection of Italian, Dutch and Flemish Oil Paintings, and Statuary casts and busts. The Museum is freely open to the public from 9 a.m. to 5 p.m.

Total Number of Educational Institutions

Of all kinds reported by the Education Department as in operation in the Province of Ontario during 1892, were 6,023 attended by 510,000 pupils, and expending over \$5,100,000 in their support.

Safe Business Rules.

Business men, in business hours, attend only to business matters. Social calls are best adapted to the social circle. Make your business known in few words, without loss of time. Let your dealings with a stranger be most carefully considered, and tried friendship duly appreciated. A mean act will soon recoil, and a man of honor will be esteemed. Leave "tricks of trade" to those whose education was never completed. Treat all with respect, confide in few, wrong no man. Be never afraid to say no, and always prompt to acknowledge and rectify a wrong. Leave nothing for to-morrow that

should be done to-day. Because a friend is polite, do not think that his time is valueless. Have a place for every thing, and every thing in its place. To preserve long friendship, keep a short credit; the way to get credit is to be punctual; the way to preserve it is not to use it much. Settle often; have short accounts. Trust no man's appearances; they are often deceptive, and assumed for the purpose of obtaining credit. Rogues generally dress well. The rich are generally plain men. Be well satisfied before you give a credit that those to whom you give it are safe men to be trusted.

Close Season for Game in Ontario.

The close season for Deer, Elk, Moose, Reindeer and Caribou is from 15th Nov. to 20th Oct. of the following year, but no Moose, Elk, Reindeer or Caribou must be hunted or killed before 25th October, 1895. No dogs must be allowed to run Deer in the close season. No person must kill more than two Deer in the season. Hunting or killing Deer by what is known as "crust-fing" or while they are "yarding" is forbidden. No common carrier or other person shall transport or have in possession for that purpose, any deer, or raw skin thereof, save only from 20th Oct. to 22nd Nov. in each year, unless accompanied by an affidavit that same was taken during the hunting season.

The close season for Grouse, Pheasants, Prairie Fowl, Partridge, Woodcock, Snipe, Rail, Plover or any other water-fowl or game bird or animal, including black or grey Squirrels and Hares, is from 15th Dec. to 15th Sept. in the following year. For Quail or wild Turkeys from 15th Dec. to 15th Oct. of the following year, but no wild Turkeys must be killed before 15th Oct., 1897.

The close season for Swans and Geese is from 1st May to 15th Sept., and for Ducks of all kinds from 15th Dec. to 1st Sept. following. No person shall kill more than 400 Ducks during the season.

No wild fowl must be taken between sunset and sunrise, nor on the Lord's Day.

No Snipe, Woodcock or Partridge shall be sold or purchased before 15th Sept., 1894. No Quail or Wild Turkey shall be sold or purchased before 15th Oct., 1894.

No beaver, sable, marten or otter shall be hunted, taken, killed, or had in possession between 1st April and 1st Nov, nor trap set for them during that period, and no muskrat between 1st May and 1st Nov. But no beaver or otter shall be hunted, taken or killed before 1st Nov., 1897.

No person except residents of Ontario and Quebec shall be entitled to hunt without first procuring a license from the Provincial Secretary, the cost of which is \$25.

The Game Laws do not apply to Indians or to settlers in unorganized districts who kill game for food.

Synopsis of Fishery Laws.—Net fishing of any kind is prohibited in public waters, except under Leases or Licenses. The size of nets is regulated so as to prevent the killing of young fish. Nets cannot be set or seines used so as to bar channels or bays. A general weekly Close-time is provided in addition to special close-seasons. The use of Explosive or Poisonous substances for catching or killing fish is illegal. The use of firearms for killing fish is prohibited. Mill-dams must be provided with efficient fish passes. Models or drawings will be furnished by the Department of Marine and Fisheries on application.

The above enactments and close-seasons are supplemented in special cases, under authority of the *Fisheries Act*, by a total prohibition of fishing for stated periods. All communications relating to Fisheries should be addressed to the Deputy Minister, Department of Marine and Fisheries, Ottawa.

Admiralty Division.

In pursuance of the powers given by "The Colonial Court of Admiralty Act, 1890," the Exchequer Court of Canada is declared a Colonial Court of Admiralty. (See 54-55 Vic., Cap. 29.)

The Admiralty Court has all rights and remedies in all matters (including cases of contract and tort and proceedings *in rem* and *in personam*) arising out of or in connection with navigation, shipping, trade and commerce, which may be had or enforced in any Colonial Court of Admiralty, under "The Colonial Court of Admiralty Act, 1890," throughout Canada and the waters thereof, whether tidal or non-tidal, or naturally navigable or artificially made so.

Admiralty business may be transacted at the office of the Exchequer Court at Ottawa, or at the local registry offices.

There are Admiralty Districts presided over by Local Judges in Admiralty as follows:—

(a) The Province of Quebec constitutes the District of Quebec with Registry at the City of Quebec.

(b) The Province of Nova Scotia constitutes the District of Nova Scotia with Registry at the City of Halifax.

(c) The Province of New Brunswick constitutes the District of New Brunswick with Registry at the City of St. John.

(d) The Province of Prince Edward Island constitutes the District of Prince Edward Island with Registry at the City of Charlottetown.

(e) The Province of British Columbia constitutes the District of British Columbia with Registry at the City of Victoria.

(f) The Toronto Admiralty District has its Registry

at the City of Toronto, the limits being from time to time fixed by the Governor-in-Council.

OFFICERS OF THE TORONTO ADMIRALTY DISTRICT.

Registrar, John Bruce.
Marshall, William Boyd.

The Law Society of Ontario.

The Law Society was first established in 1797 by the Act 37, Geo. III., c. 13, which enabled the then practitioners of the law to form themselves into a society, and make rules for its government. By the Act of 1822, 2 Geo. IV., c. 5, "the Treasurers and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. Under Revised Statutes of Ontario, c. 145, 1887, the Benchers are, exclusive of *ex-officio* members, elected by the Bar, the *ex-officio* consisting of the Attorney-General of the Dominion for the time being, if a member of the Bar of Ontario, and all members of the Bar of Ontario who have at any time held the office of Attorney-General of the Dominion or of Ontario, or of Attorney or Solicitor-General of the former Province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the *elected*, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the Act. Vacancies during the term are filled by the remaining Benchers. On the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in Convocation every term for the call of Barristers, the admission of Attorneys and Solicitors to Practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Osgoode Hall, appropriately named after the first Chief Justice, is the Ontario "Inn of Court," or head-quarters of the Society, in which is provided accommodation for the Court of Appeal and Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

The Supreme Court of Judicature for Ontario.

COURT OF APPEAL FOR ONTARIO.—Constituted for the hearing of appeals in civil cases from the Queen's Bench, Chancery, and Common Pleas Divisions of the High Court of Justice, and from the County Courts; and the Division Courts also in cases defined as to amount, and appeals from criminal cases from the Queen's Bench, Common Pleas, and County Courts. From the judgment of this Court an appeal lies, at the option of litigants, either to the Supreme Court of the Dominion, or to Her Majesty in Privy Council, in cases over £1,000, or where annual rent, fee, or future rights of any amount, are affected. The Judges of this Court, may be placed on the rota for the trial of Election petitions, with the Justices of the High Court, who as *ex-officio* Judges of this Court, choose from their number a Judge or Judges to sit in Appeal in case of there being a vacancy in this Court, or if, from illness or some other cause, one of the Judges of the Court is unable to be present, or is under any legal disqualification to hear an appeal. *Chief Justice of Ontario*—Hon. John Hawkins Hagarty, D.C.L. (\$6,000). *Justices of Appeal*—Hon. G. W. Burton, Hon. F. Osler, Hon. James MacLennan (\$5,000 each). *Registrar*—Alexander Grant. *Usher and Messenger*—E. Oliver.

COURT OF APPEAL.—This Court holds its sittings at such time and for such periods as the Judges shall, from time to time, deem necessary or convenient for the speedy dispatch of business, the times now fixed being the first Tuesday in March and September, and the second Tuesday in January, May and November; notice of the holding of such sittings being given according to the usual practice.

High Court of Justice for Ontario.

QUEEN'S BENCH DIVISION.—The jurisdiction of this Division extends to all manner of actions, causes and suits, criminal and civil, real, personal and mixed, within Ontario, and it may proceed in such, by such process and course as are provided by law, and as shall tend with justice and despatch to determine the same; and may hear and determine all issues of law, and also (with the inquest of twelve good and lawful men in the cases provided for) try all issues of fact, and give judgment, and award execution thereon, and also in matters which relate to the Queen's Revenue (including the condemnation of contraband or smuggled goods) as may be done by Her Majesty's Superior Courts of Law in England. *Chief Justice*—Hon. J. D. Armour (\$6,000). *Members of the Queen's Bench Division*—Hon. W. G. Falconbridge, Hon. W. P. R. Street (\$5,000). *Registrar*—James S. Cartwright. *Clerks*—P. J. Brown, C. O. Strange, M. B. Black. *Crier and Usher*—Robt. Lawson.

CHANCERY DIVISION.—This Division has the like jurisdiction as the Court of Chancery in England, in cases of fraud, accident, trusts, executors, administrators, co-partnerships, account, mortgages, awards, dower, infants, idiots, lunatics and their estates, waste, specific performance, discovery, and to prevent multiplicity of suits, and may decree the issue, repeal, or voidance of letters patent, and generally the like powers which the Court of Chancery in England possesses to administer justice in all cases in which there is no adequate remedy at law. *Chancellor*—Hon. John A. Boyd (\$6,000). *Members of the Division*—Hon. R. M. Meredith, Hon. Thos. Ferguson and Hon. Thos. Robertson (\$5,000 each). *Special Examiners*—W. D. Gwynne, John Bruce, F. Arnoldi, L. B. Young, Geo. A. Boomer and Henry Wickham. *Registrar*—G. S. Holmsted. *Assistant Registrar*—A. F. McLean. *Clerk of Records and Writs*—

G. M. Lee. *Docketing Clerk*—Geo. C. Sellery. *Copying Clerk*, Alex. MacGregor. *Entering Clerk*—W. O'Neil. *Usher*—John G. O'Donohoe. *Housekeeper*—Mrs. Sutherland. *Messenger*—D. Sutherland.

COMMON PLEAS DIVISION.—This Division has the same powers and jurisdiction as a Court of Record, as the Queen's Bench Division. *Chief Justice*—Hon. Sir Thos. Galt (\$6,000). *Members of the Division*—Hon. John E. Rose, Hon. Hugh MacMahon (\$5,000 each). *Registrar*—M. B. Jackson. *Chief Clerk*—M. J. Macnamara. *Clerks*—Andrew James Elliot, R. F. Killaly. *Crier and Usher*—James Alexander.

All Divisions of the High Court have now concurrent jurisdiction under the Judicature Act, 1881.

SITTINGS OF THE QUEEN'S BENCH AND COMMON PLEAS DIVISIONS.—Hilary sittings begin first Monday in February and ends Saturday of the ensuing week; Easter sittings begin third Monday in May and ends Saturday of the second week thereafter; Michaelmas sittings begin third Monday in November and ends Saturday of the second week thereafter. The Queen's Bench and Common Pleas Divisions have power also, at their discretion, to hold sittings in banco in time of vacation (except long vacation), by virtue of a rule or order of the Court, respectively to be made in or out of term, for the hearing of such special cases or rules for new trials as shall be named in a list to be attached to any such rule or order, and for giving of judgments in cases previously argued, and for disposing of such other business as the Court in its discretion shall see fit; and one of the Judges of either of the said Divisions sits in open Court and in chambers on Tuesday and Friday of every week, as well in as out of Term, except during vacation, for the purpose of disposing of all Court and Chamber business which may be transacted by a single Judge.

LAW CIRCUITS.—*Sittings for Hearing of Actions.*—Courts of Oyer and Terminer and General Gaol Delivery are held twice a year in each County or Union of Counties. In the vacation between Hilary and Easter Terms, and between that period of the vacation after the 21st of August and Michaelmas Term, except the Counties of York, Wentworth, Carleton and Middlesex, in each of which Counties there is held a third such Court in every year, in the vacation between Michaelmas and Hilary Terms; and in the County of York there is held a fourth such Court, between Easter Term and the first day of July. The sittings for hearing of actions may, in the discretion of the Judges, be held separate and apart from the Courts of Oyer and Terminer, and General Gaol Delivery, and the Assizes for any County are not put an end to by the commencement of Term, but may continue and be held during Term, subject to special rules in such case for moving against the verdict or for new trials. The places and dates being previously arranged by the Judges.

The Courts in each Circuit are presided over by the Chancellor or one of the Members of the Chancery Division or by a retired or present Justice of the High Court or of the Court of Appeal, or by a Judge of a County Court, or by some one of Her Majesty's Council learned in the law, requested by the Chancellor or one of the Justices to act in that behalf.

CHANCERY SITTINGS.—*Sittings for the hearing of causes* including examination of witnesses, are held twice in each year, at Toronto and on Circuit, the places and dates being previously arranged by the Judges. *Sittings for the rehearing of causes* are held on the 3rd Thursday in February, the first Thursday in June, and the first Thursday in December. *The Court sits every week*, except during vacation, for the despatch of business, in the following order: *Monday*, chamber business; *Tuesday*, injunction and other motions; *Wednesday*, motions for judgment, further directions, petitions, demurrers, special cases, etc.; *Thursday*, appeals from Master's reports and rulings.

CHAMBERS.—Chambers are held each day for such business relating to actions as may be transacted by a single judge out of Court. The Master in Chambers is empowered to obtain the assistance of the Registrar of the Queen's Bench Division or of any Official Referee to sit with or for him. *Master in Chambers*—John Winchester. *Clerks*—F. Arnoldi, A. Y. Blain, and Miss A. B. G. Cull.

LONG VACATION extends from the 1st of July to the

31st of August, both inclusive. There is also a vacation from the 24th December to 6th January, both inclusive.

HEIR AND DEVISEE COURT.—Commissioners, the Judges of the Superior Courts, and such other persons as may be appointed by commission under the Great Seal. Their duties are to determine claims to land in Ontario, for which no patent has issued from the Crown in favor of the proper claimants, whether as heirs, devisees, or assignees. Sittings at Toronto, first Monday in January and July in each year. **Judges**—The Judges of the Superior Court (ex-officio), others appointed by commission. **Clerk of Commissioners**—C. Ansell Steward.

COURTS FOR THE TRIAL OF CONTROVERTED ELECTIONS.—The nature of these courts is sufficiently indicated in their title. In respect to elections for the House of Commons of Canada, the Superior Courts by one of their Judges appointed in that behalf, are invested with special Jurisdiction for the trial of contested elections, and appeals lie to the Supreme Court at Ottawa. In respect to elections for the Local Legislature of Ontario, the Judges of the Court of Appeal and of the Superior Courts of Law and Equity meet annually on or before the third day of Michaelmas sittings and severally elect, by a majority of votes, a Judge from their respective Courts to be placed on the rota for the trial of election petitions. In the case of death or the illness of a Judge so chosen, the Court of which he is a member meet and elect another Judge. Trials involving corrupt practices are presided over by two Judges, otherwise a single Judge presides, and an appeal lies to the Court of Appeal of the Province.

MARITIME COURT OF ONTARIO.—By 54-55 Vic. Cap. 29 this court has been abolished except as to pending business. **Judge**—J. E. McDougall, Q.C. **Registrar**—John Bruce. **Marshall**—Wm. Boyd.

COUNTY COURTS.—Presided over by a resident Judge in each county, assisted in some counties by a Deputy or Junior Judge. Their jurisdiction extends to all personal actions where the debt or damages claimed do not exceed \$200; and to all suits relating to debt, covenant or contract, where the amount is ascertained by the acts of the parties or signature of the defendant, to \$400; and to all bail bonds and recognizances of bail given in the County Court, to any amount; but not to cases involving the title to lands, validity of wills, or actions for libel, slander, crim. con., or seduction. An appeal lies to the Court of Appeal of Ontario.

COUNTY COURT SITTINGS AND COURT OF GENERAL SESSIONS.—The County Judge in each county holds a sitting of his Court and a Court of General Sessions in his county, for the trial of issues of fact, semi-annually on the second Tuesday in June and December, except in the County of York, in which county said Court is held four times, commencing on the first Tuesday in December and March, and the second Tuesday in May and September, the latter Courts for the trial of cases of felony and misdemeanor, but treason and capital felonies are exempted from their jurisdiction, and (except in the County of York) a sitting for the trial of issues without a jury shall be held in each county on the first Tuesday in April and October in each year. The Judge may also, in his discretion, hold additional sittings at such times as may be deemed expedient to expedite business, but only for the trial of issues of fact without a jury.

COUNTY JUDGE'S CRIMINAL COURT.—Persons committed to jail for trial, on charge of being guilty of any offence for which they may be tried at a Court of General Sessions may, with their own consent, and subject to the provisions of the Act in that behalf, be forthwith tried by the Judge of the County Court and General Sessions without a jury, and if convicted, be sentenced by said Judge; and the Judge sitting on any such trial for all the purposes thereof, is constituted a Court of Record, and the record in any such case shall be filed among the records of the Court of General Sessions last mentioned.

COUNTY COURT TERMS.—The several County Courts in Ontario hold four sittings in each year, commencing respectively on the second Monday in the month of January, and the first Monday in the months of April, July, and October, except the County of York, which commences on the first Monday in April, and the second Monday in January, June and October, and ending on

the Saturday of the same week, unless extended by order of the Judge.

BOARD OF COUNTY JUDGES.—**Chairman**—S. J. Jones, County Brant. **Members**—D. J. Hughes, County Elgin; E. J. Senkler, County Lincoln; H. S. McDonald, Counties Leeds and Grenville; W. W. Dean, County Victoria.

COURTS OF REVISION.—The County Judges hold annually Courts of final revision of the Assessment Rolls of each Municipality, being in the light of Courts of Appeal from the first Court of Revision held by the Municipality; and also Courts for the Revision of the Voters' Lists for Provincial Elections. The Voters' Lists for Dominion Elections are now settled by Revising Barristers under the Act of 1885.

SURROGATE COURTS.—The jurisdiction of these Courts relates to all testamentary matters and causes, and to the granting and revoking of probate of wills, and letters of administration of the effects of deceased persons having estate or effect in Ontario, and all matters arising out of or connected with the grant or revocation of probate or administration, subject to an appeal to the Chancery Division. The County Judges are also Judges of the Surrogate Courts. **Chief Surrogate Clerk at Toronto**—Sir J. L. Robinson, Bart. **Assistant**—F. A. Robinson.

DIVISION COURTS are held for the summary disposal of cases by the presiding Judge, being the County Judge or his Deputy, or any Barrister appointed to hold the same; but a jury of five persons may be demanded in certain cases. Their jurisdiction extends to actions of debt or contract where the balance claimed is over \$100 and under \$200 and the original amount was ascertained by the signature of the defendant, and to \$100 in other cases of debt, subject in some cases to an appeal to the Court of Appeal; but the sum of the account to be gone into cannot exceed \$400; injuries or torts to personal chattels amounting to \$60; and personal actions to that amount, if not excepted from their jurisdiction; but not to actions for gambling debts, liquor drunk in a tavern, or notes of hand given therefor, ejectment, title to land, &c., or any toll, custom or franchise, will or settlement, malicious prosecution, libel, slander, crim. con., seduction or breach of promise, or actions against a J. P. for anything done by him in the execution of his office, if he objects to it. Each Judicial District is divided into Court Divisions, and Courts are held once in two months in each Division, or oftener at the discretion of the Judge. The Divisions are established by the Courts of General Sessions, and in certain cases by the Judges.

APPOINTMENT OF JUDGES IN CANADA.

By the British North American Act it is provided that the Governor General shall appoint the Judges of the Superior, District and County Courts, except those of the Courts of Probate in Nova Scotia and New Brunswick, and that their salaries, allowances and pensions shall be fixed and provided by the Dominion Parliament. It is also provided that the Judges of the Courts of Quebec shall be selected from the Bar of that Province, and there is a similar provision for the selection of the Judges in Ontario, Nova Scotia and New Brunswick, until the laws relative to property and civil rights and the procedure of the courts in those Provinces are made uniform.—*Statistical Record.*

**SUMMARY OF ACTS PASSED DURING THE SESSION OF THE PARLIAMENT OF CANADA,
56 VICTORIA, (1893).**

CHAPTER 1.—Provides for defraying the expenses of the Public Service for the year ending 30th June, 1894.

CHAPTER 2.—Enables the Governor in Council to grant subsidies of various amounts therein set forth to the several railway companies therein mentioned to aid in the construction of the railways of the respective companies. It is provided that the subsidies shall be payable out of the Consolidated Revenue Fund of Canada by instalments as the various sections of the several railways shall be completed.

CHAPTER 3.—Extends the time within which the Governor in Council may grant free homesteads in scrip to members of the Canadian Militia in active service in the North West until 1st January, 1894.

CHAPTER 4.—Provides that the Governor in Council where authorized by Act of Parliament to grant a subsidy in land to a railway corporation may grant such subsidy wholly or in part in tract each comprising a township or fractional part of a township.

CHAPTER 5.—Enables the Governor in Council to grant an annual subsidy, not exceeding £25,000 sterling, for a term of not more than ten years to aid in the establishment of a monthly steamship service between British Columbia and the Australian Colonies and New Zealand.

CHAPTER 6.—Confirms an indenture of sale of the Carleton City of St. John Branch Railroad from the Government of Canada to the City of St. John in the Province of New Brunswick.

CHAPTER 7.—Provides that the Governor in Council may appoint a member of the Senate and a member of the House of Commons as Commissioners to represent Canada at the World's Columbian Exposition to be held at Chicago this year.

CHAPTER 8.—Provides that fees or sums of money held or payable in connection with proceedings before Parliament shall be deposited and form part of the Consolidated Revenue Fund of Canada.

CHAPTER 9.—Defines the limits and provides for the representation of certain electoral districts in Canada.

CHAPTER 10.—Provides that the present voter's lists shall continue in force until finally revised in 1894.

CHAPTER 11.—Provides that during the present Session of Parliament deduction shall not be made from member's sessional indemnity for absence from a sitting of the House during a period of six days.

CHAPTER 12.—Provides that the provisions of the Civil Service Superannuation Act shall not apply to any person appointed to the Civil Service after the passage of this Act whose age at time of appointment exceeds 45 years. Also that as to persons hereafter appointed to the Civil Service whom the Civil Service Superannuation Act is applicable there shall be a deduction from their salaries of $3\frac{1}{2}$ per cent. in case the salary be \$600 or upwards, otherwise 3 per cent., to be carried to the credit of a fund to be called the Civil Service Superannuation Fund No. 2, which fund shall be supplemented by the Government and a statement of which shall be submitted to Parliament within fifteen days after the commencement of each session.

CHAPTER 13.—Provides for insurance by the Government of members of the Civil Service enabling the Minister of Finance to make insurance contracts with such members for the payment to their families in case of death in consideration of a deduction of 3 per cent. to be made from their salaries of minimum and maximum amounts of \$1,000 and \$2,000 respectively. A statement respecting all such insurance contracts to be laid before Parliament within fifteen days after the commencement of each Session.

CHAPTER 14.—Enables the Governor in Council to make regulations as to what persons in the public service shall receive commissions under the Great Seal or under the Privy Seal respectively.

CHAPTER 15.—Provides that printing for Government railways may under certain conditions be done elsewhere than in the Government printing establishment.

Approved Risks Insured upon the most Reasonable terms.

Losses promptly and liberally settled.

This Company has acquired by purchase the Canadian business and good will of the City of London Insurance Company, assuming thereby liabilities for all current risks. It also respectfully desires the continuance of the connection thus formed.

CHAPTER 16.—Establishes the rate of Customs duties upon certain articles specified therein.

CHAPTER 17.—Amends the Act respecting the Royal Military College at Kingston. It establishes maximum salaries for the commandant and staff. It enables the Governor in Council to make regulations as to the number and duties of the staff and for the government and administration of the affairs of the college. It also provides that there shall be a subordinate military staff and a subordinate civilian staff; that the number of cadets shall not exceed 120 and that they shall be subject to such rules and regulations as Her Majesty's troops are subject to.

CHAPTER 18.—Provides for the granting to certain persons therein named homestead entry for the lands set opposite their names upon proof, to the satisfaction of the Minister of the Interior that such persons were in *bona fide* occupation of such lands prior to 1st January, 1880, and have since occupied and cultivated them.

CHAPTER 19.—Amends "The Homestead Exemption Act" by making 160 acres of land exempt from execution.

CHAPTER 20.—Amends "The Act respecting the Harbour and River Police of the Province of Quebec" by providing that the tonnage duty payable under the Act shall not be levied after the Harbour and River Police shall have ceased to be maintained under the Act.

CHAPTER 21.—Provides for the constitution of the corporation of the Harbour Commissioners of Montreal and declares that the Commissioners may borrow money to redeem debentures.

CHAPTER 22.—Repeals pursuant to the power granted by section 547 of "The Merchant Shipping Act 1854," sections 26, 27 and 28 of "The Merchant Shipping Act 1876," and sections 1 and 2 of "The Merchant Shipping Act of 1890," so far as they relate to ships registered in Canada, and it is provided that the Act shall not come into force until Her Majesty's pleasure therein has been signified by proclamation in the *Canada Gazette*, nor until a proclamation of the Governor in Council brings it into effect has also been published in the *Canada Gazette*.

CHAPTER 23.—Amends "The Wrecks and Salvage Act" as to enquiries and investigations in certain cases.

CHAPTER 24.—Amends "The Inland Seamen's Act" by providing that masters shall have a lien for their wages and disbursements properly made on account of the ship.

CHAPTER 25.—Amends "The Steamboat Inspection Act" by providing that no person shall serve as engineer in any passenger steamboat of whatever tonnage or on any freight steamboat of over 150 tons gross unless he holds a certificate from the Minister for the grade in which he is employed. Also by providing for the recovery of penalties incurred under the Act, and declaring that such penalties shall go to the credit of the Consolidated Revenue Fund of Canada.

CHAPTER 26.—In amendment of "The Act respecting Joint Stock Companies to facilitate the transmission of timber down rivers and streams" establishes the tolls to be collected upon different kinds of timber therein named. This Act is not to come into force until 1st January 1894.

CHAPTER 27.—Amends "The Railway Act" by making new provisions for safety at railway crossings.

CHAPTER 28.—Merely corrects a clerical error in the French version of section 4 of "The Bank Act."

CHAPTER 29.—Amends "The Supreme and Exchequer Court Act" by substituting words in section 29 of that Act.

CHAPTER 30.—Abolishes certain holidays, viz: Corpus Christi, the Annunciation and the Festival of St. Peter and St. Paul.

CHAPTER 31.—Respecting witnesses and evidence applies to all criminal proceedings and all civil proceedings in respect of which the Parliament of Canada has jurisdiction. It provides that a person shall not be incompetent to give evidence by reason of interest or crime. That every person charged with an offence and the wife or husband of such person shall be a competent witness, but that no husband shall be competent to disclose any communication made to him by his wife during their marriage and that no wife shall be competent to disclose any communication made to her by her husband during their marriage. It also provides that no person shall be excused from answering any question upon the ground that the answer may tend to criminate him or establish his liability to any civil proceedings, but that no evidence so given shall be used in evidence against such person in any future criminal proceedings against him other than a prosecution for perjury in giving such evidence. It also provides the means of proof of proclamations of the Governor General and Lieutenant Governors, judicial proceedings in the United Kingdom, Colonies, or any foreign country, Imperial proclamations, official and public books or documents etc.; and further provides for the administration of oaths, affirmations and statutory declarations, and that judicial notice shall be taken of all Acts of the Imperial Parliament, ordinances made by the Governor in Council or the Lieutenant Governors in Council, and of the Acts of the Legislatures of the Provinces of Canada. This act does not come into force until the 1st July, 1893.

CHAPTER 32.—Amends the Criminal Code 1892 in the several particulars set forth in a schedule.

CHAPTER 33.—Applies only to the Province of New Brunswick and provides for the imprisonment of juvenile offenders in an industrial home to be established in the said Province.

CHAPTER 34.—In amendment of "The Patent Act" relates to the requirements of applications for patents, and the duration of patents where a partial fee only is paid. It also provides as to the manner of issuing patents.

CHAPTER 35.—Amending "The General Inspection Act" sets forth the qualifications for inspected Canadian apples.

CHAPTER 36.—Amends "The Petroleum Inspection Act" in various particulars relating to the inspection and testing of petroleum and naphtha to be sold for use in Canada.

CHAPTER 37.—Prohibits the manufacture or sale of filled imitation cheese and provides for the branding of cheese manufactured from skimmed milk. Also that cheese and butter produced in any foreign country shall when offered or exposed for sale in Canada have branded upon the box or package containing the same the name of the country where produced.

The remaining Acts are local and private, and the nature of each is indicated by its title.

LEGAL BREVITIES.

A note made on Sunday is void. A note obtained by fraud, or from one intoxicated, is void. If a note be lost or stolen, it does not release the maker, he must pay it. An endorser of a note is exempt from liability, if not served with notice of its dishonor within 24 hours of its non-payment. A note by a minor is void. Notes bear interest only when so stated. Principals are responsible for their agents. Each individual in partnership is responsible for the whole amount of the debts of the firm. Ignorance of the law excuses no one. It is a fraud to

conceal a fraud. It is illegal to compound a felony. The law compels no one to do impossibilities. An agreement without consideration is void. Signatures in lead pencil are good in law. A receipt for money is not legally conclusive. The acts of one partner binds all the others. Contracts made on Sunday cannot be enforced. A contract with a minor is void. A contract with a lunatic is void. Written contracts concerning land must be under seal.

THE CANADIAN ADIRONDACKS.

Express trains each way daily, to and from ROBERVAL, LAKE ST. JOHN and CHICOUTIMI.

Parlor and Sleeping Cars. Magnificent Scenery.

Good Hotel accommodation at Lake St. Joseph, Lake Edward, and Roberval. Excellent fishing for trout and fresh water salmon. The finest Wheat lands in the Province of Quebec are now offered for sale by the Provincial Government in the Lake St. John Territory. For particulars see Folders.

The HOTEL ROBERVAL, Roberval, has been greatly enlarged and now has accommodation for 300 guests. A new and commodious hotel—THE ISLAND HOUSE—has been built on an island in the Grand Discharge fishing grounds, and is run in connection with Hotel Roberval. These Hotels control the fishing rights of Lake St. John and tributaries, together with the Grand Discharge, and ten miles of the Saguenay River, making these the most attractive fishing grounds in North America, covering an area of 20,000 square miles of fishing privileges, all of which are free to the guests of the Hotels.

A commodious steamer, the "Mistassini," runs daily during the tourist season between Roberval and the Island House, Grand Discharge, thirty miles distant.

The Chicoutimi extension, extending from Lake St. John to Chicoutimi, offers to tourists a new round trip, namely, from Quebec to Lake St. John, and thence to Chicoutimi by rail, and down the Saguenay and back to Quebec by water. It is no exaggeration to say that this trip, for grandeur of scenery, is unequalled in America.

LIFE INSURANCE.

There are at present thirty-one companies engaged in the business of life insurance in Canada. Of these twelve are Canadian, nine British, and ten American. During the year 1892, which is the last one of which we have returns, there was \$44,620,013 new insurance taken, which was greater by over six millions than in 1891.

The total amount of insurance in force at the end of 1892 was \$279,110,265 divided as follows:—

Canadian companies	\$154,709,077
British do	33,692,706
American do	90,708,482

\$279,110,265

During the year the amount of insurance terminated by natural causes, that is by death or maturity was \$5,331,983, while the amount surrendered or lapsed was \$22,598,994.

The premium income during 1892 was as follows:—

Canadian companies	\$4,729,940
British do	1,088,816
American do	3,251,598

\$9,070,354

The total amount paid to policy-holders during 1892 was as follows:—

Death claims (including bonus additions)	\$3,233,144 38
Matured endowments do	838,814 88
Annuity payments	52,668 83
Paid for surrendered policies	509,020 78
Dividends to policy holders	818,502 44

Total.....\$5,452,151 31

In selecting a company in which to insure one's life, the first consideration should be safety, and economy the second. As the taking of a policy is a matter of importance to most men, they should be sure that the company they are going into is sound financially. Every year there is published by the Superintendent of Insurance at Ottawa a report containing the true financial position of all the different companies, a little study of which will make it plain to any business man.

The following table gives the premiums charged by some of the principal life insurance companies for insuring \$1,000 at different ages. Besides the "straight life" insurance there are other attractive plans given by most of the companies, such as "endowments," "limited payments," "terminal" and "semi-tontine," etc., all of which will no doubt be explained by the enterprising agent, and should be carefully considered in all their bearings by the intended insurer:—

A popular plan of Life Insurance among business men is the ten payment life plan. Under this arrangement the insurer pays his premium for ten years and the policy is then paid up, he has nothing more to pay. In the event of his death at any time after insuring, the amount of the policy is paid to his heirs as he may direct. After the term of ten years the profits accruing are either added to his policy or drawn out in annual dividends. The following table gives the rates charged by fifteen of the leading companies for this style of insurance.

Lapham's Rival Fountain Pen

(PATENTED JANUARY 24, 1888.)

The distinctive features of "Lapham's Rival" is the slotted feed piece, which is constructed with a series of slots or openings from the rear end, one of which extends over the top of the pen, and all of which form capillary spaces, which serve to hold the ink in immediate contact with the pen and prevent a too rapid flow to the point.

This operates to overcome one of the most serious objections to the use of Fountain Pens, namely, the liability to "drop ink" or "overflow," especially when the holder is nearly empty. It has rapidly grown in favor since its introduction in 1886, and thousands of voluntary testimonials indicate its general popularity. By its merits it has reached the foremost place among Fountain Pens. The holder is of vulcanized rubber, and only the best quality of diamond pointed gold pens are used in its construction. It is simple and easily managed, infringes no fountain pen patent, and every pen is unconditionally warranted.

WILLS AND EXECUTORS.

The making of a Will is a duty that men are apt to postpone, and in many cases it is not done at all. Every man should make a Will, no matter how small his estate may be, it will save a great deal of trouble and generally a large amount of expense to those he loves if he leaves a properly attested Will behind him.

Although it is advisable to employ a responsible attorney still it is not necessary to have a Will drawn up by a lawyer. Any man can make his own by attending carefully to the directions given below. Of course where there is a good deal of property to be divided and especially where it is intended to give a life interest, or to have property "tied up" until the death or remarriage of a wife or until children become of age it is always best to consult a good solicitor. Moreover it should not be regarded lightly or done in a hurry. A man should think over the matter and carefully decide what he intends doing with his property. He should remember that his Will is only operative after his death when he is no longer here to explain matters and should therefore express his intentions in as clear and plain language as he can. While it is not possible to provide for every contingency, he should think over the most probable ones and take care of them.

Who May Make a Will.

Any person of the full age of twenty-one years and not incapable from insanity may make a Will.

In the Province of New Brunswick and Nova Scotia married women living with their husbands require the consent of their husbands in writing, but in Ontario, Quebec and British Columbia such consent is not necessary.

The person making the Will is called the **TESTATOR** or if it be a woman the **TESTATRIX**.

How to Make a Will.

All Wills must be in writing (except soldiers and sailors when on active military service or at sea) and should be written in ink and if possible on a single sheet of paper. The Will should be expressed in clear language avoiding any so called legal terms when the same meaning may be conveyed in ordinary every day words. No changes or erasures should be made. If a mistake is made in writing out a Will it is better to rewrite the whole and after signing no alteration of any kind is allowed. If before the Will is signed a word has to be changed the Testator and Witnesses must place their names or initials opposite to each alteration.

The customary form of beginning a Will is as follows, "This is the last Will and Testament of me, John Smith, of the City of Toronto, in the County of York, Bookseller." Then should follow directions for the disposal of his estate and the appointment of Executors ending in this manner "and I hereby revoke all former and other Wills and Codicils by me at any time heretofore made." Dated at Toronto, this Twenty-first day of May, 1892.

The Execution of a Will is the most important part of it and the directions should be carefully followed. The Testator must sign his or her name at the end of the Will in the presence of two competent witnesses who must immediately sign their names in his and each others presence.

No one who has been left money or property in a Will or who may in any way obtain any benefit thereunder, either personally or through their wives or husbands, should sign as witness, as by so doing they would forfeit their legacy or benefit under the Will. They are however competent witnesses.

The witnesses should sign their full names and addresses with occupation, as they might be wanted at some subsequent time.

Opposite or beneath the signature of the Testator should be written the following, which is called the attestation clause. "Signed, published and declared by the Testator as his last Will and Testament in the presence of us, present at the same time, who, at his request, in his presence and in the presence of each other, have subscribed our names as witnesses."

Thomas Jones of No. 325 Gordon Avenue, Carpenter, Toronto.

William Robinson of No. 120 Hawthorne Road, Merchant, Toronto.

If this attestation clause is not written at length, the facts and formalities therein set forth will require to be proven to the satisfaction of the Surrogate Judge, before probate of the Will will be granted in Ontario.

If the testator should from physical causes be unable to sign his name, he can put his mark to it, or it may be so signed for him by some other person in his presence and by his direction, who should not be one of the witnesses. In such a case the Will should be read over to the testator who should clearly indicate that he understands what has been read, and it would be well to have the attestation clause set forth the fact of reading over and understanding.

Codicils.

As time goes on and circumstances change it is sometimes desirable or necessary to make a change in the distribution of one's estate; for this purpose a Codicil is added to the Will. A Codicil should be as follows, "This is a Codicil to the last Will and Testament of me, John Smith, of the City of Toronto, in the County of York, Bookseller, bearing date the Twenty-first day of May, 1892." Then follow the particulars of the change desired. The Codicil must be signed and witnessed exactly the same as a Will the same formalities being observed. Unless the changes are slight, it is found that most persons prefer to execute a new Will, drawn to suit the altered circumstances.

Miscellaneous Instructions.

Executors should be named in the Will. One is sufficient but it is better to have two. Their full names and addresses with occupation should be given so as to avoid future trouble. The clause appointing Executors is usually worded as follows "I appoint A. B. of No. 19 (Blank) Street, (Occupation), Toronto; and C. D. of No. 23 (Blank) Ave., (Occupation), Hamilton, Executors of this my Will." Where the property is all left to the wife it is a good plan to appoint her sole Executrix. In such a case the wording is as follows "I hereby give devise and bequeath all my real and personal estate and effects to which I am now or in any way hereafter may become entitled, unto my dear wife Mary Smith absolutely and I hereby appoint her my said wife sole Executrix of this my Will at the same time revoking all former and other Wills and Codicils by me at any time heretofore made."

A Will is revoked by a subsequent one, but only so far as its clauses are inconsistent, for this reason it is customary to put in the clause just given revoking all previous Wills and Codicils.

Marriage in every case cancels a Will, hence after marriage a new Will should be made or the old one re-acknowledged.

A Will which has been in any way cancelled may be revived by the re-execution thereof or by a codicil thereto showing the intention to revive the same.

When an estate is of any moment it is customary to name a residuary legatee: the object of this is that in case any portion of the estate should not be specified in the Will it may be provided for. The wording is as follows "And as to all the rest, residue and remainder of my real and personal estate I devise and bequeath the same unto A. B. his Heirs, Executors, Administrators and Assigns absolutely forever."

When property is left to children under age, the custom is to appoint trustees who hold it in trust for the children. They may use the income from the estate for the maintenance of the children and hand over the principal when directed by the Will. Such Trustees hold a very responsible position and should be very careful of their acts as they may be held responsible for any loss that may occur.

It is also well when leaving all ones property to a wife or husband to appoint her or him guardian of the children. This may save considerable trouble.

Executors or trustees are not bound to act and should they decline or have pre-deceased the Testator, one of the High Courts should be asked to appoint some one to act in their stead.

Succession Duty in Ontario.

In the Province of Ontario by the Succession Duty Act of 1892, estates of persons dying after July 1st, 1892, are subject to the following duties—

When the estate is under \$10,000 it is free of duty. When under \$100,000, and left to father, mother, husband, wife, child, grandchild, daughter-in-law or son-in-law it is free of duty.

When the value of the estate is over \$100,000, and passes to any of the near relatives in the preceding clause a tax of 2½% is levied.

When the value exceeds \$200,000, and passes as above a tax of 5% is levied.

When the value exceeds \$10,000, and is left to any relatives except those above mentioned the duty is 5% and when the value exceeds \$10,000 and passes to any stranger in blood the duty is 10%.

Legacies for religious, charitable or educational purposes are exempt from duty and legacies to any one person of less than \$200 are also exempt.

The duties provided for in this Act are payable within 18 months from the death of the owner.

THE BRITISH EMPIRE.

The following brief table gives an abstract of the Area, Population, Revenue, and Commerce of the British Empire throughout the World. Brief as it is, it deserves careful study. The material greatness of the country is amazing—it exceeds that of any other Empire ancient or modern. Its moral greatness is equal to its material. The Empire is governed by settled Law, every man's property is protected; his person, like his property, cannot be touched except by legal process. Religion is free. And although susceptible of much improvement, the British Empire under the present Sovereign presents the nearest approach to a true Commonwealth that the world has yet seen. The teaching of this should be more insisted upon in our schools—OUR OWN COUNTRY—the Mother of Nations, its history, its laws, its literature, its battles, its commerce, its great citizens, are themes which might worthily replace much of the useless erudition impressed upon boys at school, and too commonly forgotten immediately they leave. The history of "Our Own Country"—whose language is daily spoken by more than a hundred millions of our people and understood by fifty millions more, and which bids fair to become the language of the world—is a subject worthy of study:

TORONTO ELECTRIC INSTITUTE AND SANITARIUM

231 and 192 JARVIS ST., TORONTO

For the Treatment and Cure of Diseases not cured with medicine or other methods of using Electricity with the ordinary Batteries and Electrical Appliances of little or no value (curatively).

Patients treated either at the Institution, their homes, or private apartments for diseases Acute, Chronic, Obscure, Nervous or others. We employ superior medical skill for Special Diseases, operations, &c.

FEMALE WEAKNESSES.—Uterine Diseases most successfully treated with Electricity; also Nervous Debility (a lack of nerve force), etc.

With the proper knowledge of compounding the best qualities of Electricity and the use of our new improved Medical Batteries the subtle fluid is made to obey the mandates of the will in accordance with nature's laws, and thus act upon the most obstinate forms of disease, speedily changing the condition to health and vigor, and as kindly and quietly as the genial rays of the sun in spring time mellow the frozen earth and infuse new life in the soil.

The mystery in making such marvellous cures is simply in knowing how to utilize the most potent and effective means in the world. Evidence in abundance of the highest type confirming all and more than we claim for this mighty agent properly manipulated from our superior machine. (A complete hand-book with each battery.) See the *Electric Age* for testimonials and references, such as Chas. Stark, Esq., Merchant, 52 Church St., Toronto; Rev. G. M. Milligan, 334 Sherbourne St., Toronto; Rev. NEW ILLUSTRATED EDITION

OF

THE OXFORD BIBLE FOR TEACHERS

Containing many new features, and a series of upwards of sixty full-page plates illustrating Biblical antiquities.

Sir William Dawson, C.M.G., LL.D., Principal McGill University, Montreal, Que. :—

"The Oxford Helps I have long used with advantage, and the new edition, while retaining the reasonable conservatism of the old, has been greatly extended and improved, especially by the facts respecting the testimony of Modern Discoveries in favor of Bible history. The illustrations are quite a new feature and serve to bring before the eye much of the actual monumental corroboration. Almost every one of the illustrations might form the subject of a good lesson on Bible history."

The Wesleyan :—

"An invaluable contribution to the literature relating to Biblical studies.

The Christian Guardian, Toronto :—

"Well adapted to be specially helpful to all ministers, teachers and Bible students. We can cordially recommend it to teachers and preachers."

Canadian Methodist Quarterly :—

"A perfect treasury of everything needed for the exact study of the English Bible exceedingly full of very rich material."

Toronto Globe :

"An eminently comprehensive hand-book."

Montreal Witness :—

"Contains a great amount of useful information."

American Bookmaker :—

"No such complete and accurate guide to the study of the Scriptures has ever before been published."
